

## ICD-10 MS-DRGs Version 38.1 Effective January 1, 2021

In response to the national emergency that was declared concerning the COVID-19 outbreak, the Centers for Disease Control and Prevention’s (CDC) National Center for Health Statistics (NCHS) is implementing new diagnosis codes into the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM), effective January 1, 2021.

The ICD-10 MS-DRG Grouper assigns each case into an MS-DRG based on the reported diagnosis and procedure codes and demographic information (age, sex, and discharge status).

The ICD-10 Medicare Code Editor (MCE) Version 38.1 software uses edits to detect and report errors in the claims data for the ICD-10 codes reported to validate correct coding on claims for discharges on or after January 1, 2021.

The ICD-10 MS-DRG Grouper software package to accommodate these new codes, Version 38.1, is effective for discharges on or after January 1, 2021.

Assignment of the new ICD-10-CM diagnosis codes<sup>1</sup> are as follows:

Diagnosis Code	Description	CC	MDC	MS-DRG
J12.82	Pneumonia due to coronavirus disease 2019	MCC	04	193, 194, 195

Z20.822	Contact with and (suspected) exposure to COVID-19	N	23	951
