

**State Demonstrations to Integrate Care for Dual Eligible Individuals**  
**Design Contracts**  
**Summary of State's Initial Design Concepts**  
**May 2011**

**State: Oklahoma**

<b>Overview of Proposed Approach</b>	<p>Oklahoma's proposal involves taking a three-pronged approach to determining the most efficient methods of care integration. Each of the three proposed concepts identifies a different aspect of care for the dual eligibles and will be developed to identify the feasibility and effectiveness of each concept.</p> <ul style="list-style-type: none"> <li>• Concept #1 involves creating an Accountable Care Organization (ACO) with embedded medical education programs (Health Innovation Zone) that specifically serves high cost patients that are eligible for both Medicare and Medicaid.</li> <li>• Concept #2 involves exploring the feasibility of establishing a benefit plan and network, administered and operated by the State. Oklahoma proposes combining the funding streams from Medicare and the Oklahoma Health Care Authority (OHCA) and using these funds to purchase coverage through a plan and network developed and administered by OHCA.</li> <li>• Concept #3 looks at the expansion of Oklahoma's Cherokee Elder Care Program of All-inclusive Care for the Elderly (PACE) program Statewide. The PACE model combines the services of an adult day health center, primary care office, and rehabilitation facility into a single location. PACE provides an all-inclusive and comprehensive continuum of care designed to maintain and ideally to improve the quality of life for the elderly.</li> </ul>
<b>Target Population</b> (All duals/full duals/subset/etc.)	<p>Concept #1 would target individuals from north, east and west Tulsa who are dually eligible for Medicare and Medicaid coverage.</p> <p>Concept #2 would target all dual eligibles with a particular focus on those dual eligibles with behavioral health needs.</p> <p>Concept #3 would target dual eligibles certified to need nursing level of care.</p>
<b>Estimated Enrollment</b> (in 2012 and at full implementation)	<p>Estimated enrollment for Concept #1 is about 2,200 individuals from north, east and west Tulsa. The estimated enrollment numbers for the other two design concepts will be determined as the planning and design process moves forward.</p>
<b>Planned Geographic Service Area</b> (Statewide or listing of pilot service areas)	<p>Concept #1 will be centered in the Tulsa region. The remaining two concepts will be exploring a Statewide service area during the design process.</p>
<b>Planned Stakeholder Process</b>	<p>Oklahoma anticipates seeking the involvement of partners by invitation to an initial meeting to discuss the opportunity, then following the processes already set forth by OHCA, convening a large working group, smaller sub-groups tasked with specific solution gathering, and ad hoc discussions. All workgroups will meet monthly, and more frequently if needed. A website for distribution of meeting information (i.e. agendas, minutes, action plans, outstanding questions, etc) will be created to ensure transparency in the design</p>

	and development process.
<b>Proposed Implementation Date and Related Milestones</b> (Any implementation milestones are pending CMS Approval)	The development and design process for this proposal will begin immediately. As the design phase moves along appropriate milestones and potential dates for implementation will be determined.
