

Qualified Electronic Health Record (EHR) Direct Vendors for the 2012 Physician Quality Reporting System and Electronic Prescribing (eRx) Incentive Programs

CMS is pleased to announce the EHR Direct vendors and their system and products (including specific version or release) that have been “qualified” to submit quality data to CMS by eligible professionals for the 2012 Physician Quality Reporting System program year. Each of these EHR Direct vendors has completed a thorough vetting process to verify that their system and product(s) has the capability to provide the required data elements for the 51 Physician Quality Reporting System EHR measures. A list of the 51 measures may be found in the EHR measure specifications located under the section page entitled “Alternative Reporting Mechanisms” on the CMS website, available at <http://www.cms.gov/PQRS>. The file is titled “2012 Physician Quality Reporting System EHR Measure Specifications” and can be found in the 2012 EHR Documents for Eligible Professionals ZIP file. Some EHR Direct vendors are also capable of reporting the electronic prescribing (eRx) measure to CMS as listed in the following table. In addition to capturing the required data elements for the measure calculation, these “qualified” EHR products can transmit the required information in the requested file format. While the listed EHR Direct vendors and their qualified EHR system and product(s) have successfully completed the vetting process, CMS cannot guarantee that any other product or version of software, other than what is listed in this document, will be compatible for EHR-based submission for the Physician Quality Reporting System or the Electronic Prescribing Incentive Program. Due to an extended testing period, some vendors may have additional capabilities that are not listed on this posting. Please check with the vendor for additional information.

Eligible professionals who wish to participate in the 2012 Physician Quality Reporting System and/or Electronic Prescribing Incentive Program using the EHR-based reporting option may contact the EHR Direct vendors listed on the following pages for additional details about their software. Information on how to report your quality measure data directly from your EHR to CMS can be found under the Alternate Reporting Page on the PQRS website at <http://www.cms.gov/PQRS>. You will also find information on how to have your quality measure data count for both PQRS and the clinical quality measure component for the CMS EHR Incentive Program.

Please note: You will need an IACS account to submit your data directly from your EHR to CMS. The data submission period for program year 2012 is currently scheduled for January 1, 2013 to February 28, 2013.

Disclaimer: While CMS makes every effort, by way of a vigorous testing process, to ensure that users of these EHRs will be able to submit their quality measures data directly to CMS, CMS cannot guarantee that any individual eligible professional will be successful in sending their information to CMS using one of the systems listed below. Each vendor has reviewed their organization’s information below and provided confirmation of accuracy. Information included in this document was accurate at the time posting; however CMS cannot guarantee that these services will be available during the submission period.

*Due to the vendors’ ability to continue to test their products after the posting of this document, some additional versions may be able to successfully submit PQRS data. The 2012 EHR Direct Qualified Posting will not be updated to reflect any additional versions tested and CMS cannot guarantee these versions will be successful.

**CMS encourages EHR Direct Vendors to disclose cost information incurred by their clients, but it is not required from the 2012 Qualified EHR Direct Vendors. Cost disclosure will be required from Qualified EHR Direct Vendors in the 2013 program year.
