

## **New Hampshire: State Innovation Waiver under section 1332 of the PPACA**

*August 5, 2020*

The U.S. Department of Health and Human Services and the U.S. Department of the Treasury (the Departments) approved New Hampshire's application for a State Innovation Waiver under section 1332 of the Patient Protection and Affordable Care Act (PPACA) (the waiver). New Hampshire's application seeks to implement a reinsurance program for up to five years beginning in plan year 2021. As a result of the waiver approval, more consumers in New Hampshire may have coverage, consumers are expected to see lower premiums, and New Hampshire will receive Federal funds to cover a substantial portion of state costs for the reinsurance program.

New Hampshire's State Innovation Waiver under section 1332 of the PPACA is approved subject to New Hampshire accepting the specific terms and conditions (STCs). This approval is effective for January 1, 2021 through December 31, 2025.

### ***Summary of New Hampshire's Application for a State Innovation Waiver under section 1332 of the PPACA***

New Hampshire's application for a State Innovation Waiver under section 1332 of the PPACA seeks to waive section 1312(c)(1) of the PPACA, the requirement to consider all enrollees in a market to be part of a single risk pool, to the extent it would otherwise require excluding total expected state reinsurance payments when establishing the market market-wide rate, in order to implement the state reinsurance program for up to five years beginning with plan year 2021. The reinsurance program will operate like a traditional, claims-based attachment point reinsurance program by reimbursing qualifying non-group health insurers for a percentage of an enrollee's claims costs exceeding a specified threshold (attachment point) and up to a specified ceiling (reinsurance cap). Specifically, in 2021, the program is anticipated to reimburse claims at a 74 percent coinsurance rate for claims between the attachment point of \$60,000 and a \$400,000 cap.

As a result of the waiver approval, consumers are expected to see lower premiums, which should attract new consumers while also keeping current consumers in the individual marketplace. New Hampshire projects that under the section 1332 waiver, statewide premiums will be approximately 16% lower in 2021 than they would be without the waiver. In addition, New Hampshire predicts that the individual market's unsubsidized population will increase by about 8%, due to the lower premiums resulting from stabilization of the individual market compared to the result if no waiver program were in effect. These projections were certified by independent actuaries and reviewed by the Departments.

New Hampshire will receive pass-through funding to help offset a substantial portion of state costs for the state-established reinsurance program. Because the New Hampshire reinsurance program is expected to lower premiums on the second lowest cost silver plan, the plan used to establish the value of premium tax credits, the Federal government will spend less in premium tax credits under the waiver. As such, New Hampshire will receive pass-through funding to support the reinsurance program based on the amount of premium tax credits that would have been provided to New Hampshire absent the waiver. The pass-through funding amount may be reduced, if necessary, to ensure deficit neutrality.

The Departments have determined that New Hampshire's application for a State Innovation Waiver under section 1332 of the PPACA meets the requirements outlined in section 1332(b)(1) of the PPACA. Specifically, the waiver is projected:

- to provide coverage at least as comprehensive as the coverage defined in section 1302(b),
- to provide coverage as affordable as would otherwise be provided,
- to provide coverage to at least a comparable number of people as would otherwise be covered, and
- to not increase the Federal deficit.

***Section 1332: State Innovation Waivers***

Section 1332 of the PPACA permits a state to apply for a State Innovation Waiver to pursue innovative strategies for providing their residents with access to high quality, affordable health insurance. These waivers provide states with the opportunity to develop strategies that best suit their individual needs. Through innovative thinking, tailored to specific state circumstances, states can lower premiums for consumers, improve market stability, and increase consumer choice.

State Innovation Waivers allow states to implement innovative ways to provide access to quality health care that is at least as comprehensive and affordable as would be provided absent the waiver, provides coverage to a comparable number of residents of the state as would be provided coverage absent a waiver, and does not increase the Federal deficit.

State Innovation Waivers are available beginning January 1, 2017. State Innovation Waivers are approved for up to five-year periods, and can be renewed. The Departments welcome the opportunity to work with states on Section 1332 State Innovation Waivers. Read more about State Innovation Waivers [here](#). States interested in applying for a section 1332 waiver can find application tools and resources, including an application checklist and application templates, on our website [here](#).
