* This data is based on the MedPAR data as of July 1, 2003. There is a possibility that the data may either understate or overstate the average length of stay (ALOS) for some LTCHs because of the limitation of adapting discharge-based MedPAR data for this purpose (i.e. there may be patients that are subsequently discharged that were not included in the original data). We intend to mitigate this potential problem by posting supplemental data as MedPAR files are updated but additional data from the provider may also be necessary to document the revised ALOS.
