SUBJECT: New Fields in the Fiscal Intermediary Shared System (FISS) Inpatient and Outpatient Provider Specific Files (PSF)

I. SUMMARY OF CHANGES: This Change Request (CR) will implement a new a five character field created to house the county code on the inpatient and outpatient PSF. Currently, for inpatient and outpatient claims, Medicare Administartive Contrators (MACs) apply the out migration adjustment to the wage index annually. MACs receive a list from the Center of Medicare & Medicaid (CMS) of counties eligible for the out migration adjustment and then must manually compute a wage index for providers eligible for the out migration adjustment.

EFFECTIVE DATE: July 3, 2017 - FY 2018 for the IPPS and for CY 2018 for the OPPS.
**Unless otherwise specified, the effective date is the date of service.*
IMPLEMENTATION DATE: July 3, 2017

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

EFFECTIVE DATE: July 3, 2017 - FY 2018 for the IPPS and for CY 2018 for the OPPS.

I. GENERAL INFORMATION

A. Background: Medicare Administrative Contractors (MACs) will make a one time entry into the PSF containing the county code (similar to the geographic *Core Based Statistical Area* (CBSA) field) and Pricer will apply the out migration adjustment instead of the MACs. FISS shall pass the county code onto the Pricer which will determine if the provider is eligible for the out migration adjustment and then calculate the appropriate wage index for the provider.

Also, hospitals that qualify for geographic reclassification are not eligible for the out migration adjustment. This sometimes causes confusion amongst the MACs determining when to apply the out migration adjustment. We believe we will reduce MAC error when it comes to determining the appropriate wage index for Inpatient Prospective Payment System (IPPS) and Outpatient Prospective Payment System (OPPS) by using the current CBSA fields and the county code. For the OPPS PSF, in addition to the county code field, we are also requesting an additional two fields. The OPPS currently pays the wage index the same as the IPPS. The IPPS PSF and Pricer have a state code and 3 CBSA fields to appropriately apply the wage index. The state code and multiple CBSA fields are used to apply the rural floor and geographic reclassification appropriately. The Outpatient PSF currently only has two CBSA fields and does not have a third CBSA field. Therefore, in order to appropriately apply the rural floor and geographic reclassification in the Outpatient Pricer this CR will create an additional CBSA field that holds five characters.

B. Policy: The Center for Medicare and Medicaid Services (CMS) lists the county code for all providers in table 2 of the annual proposed and final rule. We are requesting this field be used for payment beginning with FY 2018 for the IPPS and for CY 2018 for the OPPS. However, we would like to test these fields in advance of the FY and are requesting the county code field be created by July 2017.

Obtain Medicare operating costs from the Medicare cost repot form CMS-2552-96, Supplemental Worksheet D-1, Part II, Line 53. Obtain Medicare covered charges from the MAC billing file, i.e., PS&R record. For hospitals for which the MAC is unable to compute a reasonable cost-to-charge ratio, they use the appropriate urban or rural statewide average cost-to-charge ratio calculated annually by CMS and published in the "Federal Register." These average ratios are used to calculate cost outlier payments for those hospitals where you compute cost-to-charge ratios that are not within the limits published in the "Federal Register." For LTCH and IRF PPS, a combined operating and capital cost-to-charge ratio is entered here. See below for a discussion of the use of more recent data for determining CCRs.

50.1 - Outpatient Provider Specific File
(Rev.3750.Issued: 04-19-17, Effective: 07-03-17, Implementation: 07- 03-17)

The Outpatient Provider Specific File (OPSF) contains the required information about each provider to enable the pricing software to calculate the payment amount. Data elements and formats are shown below. Contractors must maintain the accuracy of the data, and update the file as changes occur in data element values, e.g., changes in metropolitan statistical area (MSA), bed size, cost to charge ratio. An update is accomplished by preparing and adding an additional complete record showing new current values and the effective date of the change. The old record is retained without change.

Contractors must also furnish CMS a quarterly file in the same format.

NOTE: All data elements, whether required or optional, must have a default value of "0" (zero) if numerical, or blank if alphanumerical.
