## Summary of Quarterly Release Modifications

The modifications of the IOCE for the **January 2018 V19.0** release are summarized in the table below. Readers should also read through the entire document and note the highlighted sections, which also indicate changes from the prior release of the software. Some IOCE modifications in the update may be retroactively added to prior releases. If so, the retroactive date appears in the 'Effective Date' column.

#	Type	Effective Date	Edits Affected	Modification
1	Logic	1/1/2018	24	Modify the software to maintain 28 prior quarters (7 years) of programs in each release. Remove older versions with each release. The earliest date included for this release is 4/1/2011.
2	Interface	1/1/2018		Updates to the following tables (additional details included in the tables): Table 1: IOCE Control Block <ul style="list-style-type: none"> <li>- Add Value Codes and Value Code Amounts, up to 36</li> <li>- Increase the number of Condition Codes to 30</li> <li>- Increase the number of Occurrence Codes to 30</li> <li>- Remove the following fields: Ndxptr, Nsgptr, NCCptr, NOcptr, CodeTypePtr</li> <li>- Modify the Comments for the following fields: Dxeditptr, Procreditptr, Mdeditptr, Dteditptr, Rcreditptr, APCptr, Claimptr</li> </ul> Table 5: Claim Return Buffer <ul style="list-style-type: none"> <li>- Add Payer Condition Code field</li> </ul> Table 7: APC Return Buffer <ul style="list-style-type: none"> <li>- Add HCPCS Modifier field</li> </ul>
3	Logic	<b>1/1/2016</b>		Update program logic for drug HCPCS lines with SI of G or K to return the Payment APC (see processing logic and Appendix E).
4	Logic	1/1/2018		Update Appendix K to note the deletion of composite APC 8001.
5	Logic	1/1/2018		Implement program logic for payment reduction of x-rays taken using computed radiography technology. HCPCS codes reporting modifier FY are assigned new payment adjustment flag value 22 (CAA Section 502(b) reduction on computed radiography technology) (see special processing logic and Appendix G). Note: Currently the list of HCPCS codes affected by this logic is the same as that used with modifier FX.
6	Logic	1/1/2018		Implement program logic for OPPTS claims to assign a HCPCS level modifier to the line level output when drug HCPCS with SI = K are reported with new modifier JG. The IOCE adds modifier V3 to the line in the new 'HCPCS modifier' field of the program output (see processing logic and Table 7).
7	Logic	<b>1/1/2017</b>	102	Implement new edit 102: Modifiers PO/PN not allowed on the same line (RTP). Edit criteria: A claim line has both modifiers PO and PN present (see processing logic, Tables 4 and 5, and Appendix F(a) – Edits by Bill Type).
8	Logic	<b>7/24/2017</b>	103	Implement new edit 103: Modifier reported prior to FDA approval date (LID). Edit criteria: A modifier is reported prior to the mid-quarter activation date (see processing logic, Tables 4 and 5, and Appendix F(a) – Edits by Bill Type).
9	Logic	<b>1/1/2017</b>		Modify program logic for conditional packaging of laboratory services. Laboratory services with SI = Q4 have the SI changed to A if present with an OPPTS procedure that has final SI = Q1 with a line item action flag of 2 or 3 applied (see processing logic).
10	Logic	<b>6/5/2017</b>	68	Implement mid-quarter NCD approval edit for procedure code 0421T.
11	Logic	1/1/2018		Update program logic for FQHC claims for new Chronic Care Management codes G0511, G0512. If either code is reported, assign Payment Indicator = 2 and bypass edits 88 and 89 if no FQHC payment code and/or qualifying visit code is reported (see Appendix M).
12	Logic	<b>4/1/2011</b>		Update program logic for services that may be subject to deductible or deductible/coinsurance waiver. If the services are packaged with SI = N and the line item charges = 0.00, do not assign payment adjustment flags 4, 9 or 10 (see processing logic where payment adjustment flags 4, 9 or 10 are applicable and Appendix G).
13	Logic	1/1/2018	22	Add the following new modifiers to the valid modifier list: <ul style="list-style-type: none"> <li>- FY: Computed radiography x-ray</li> <li>- JG: 340B Acquired Drug</li> <li>- TB: Tracking 340B acquired drug</li> <li>- X1: Continuous/broad services</li> <li>- X2: Continuous/focused services</li> <li>- X3: Episodic/broad services</li> <li>- X4: Episodic/focused services</li> <li>- X5: Svc req by another clinician</li> <li>- 96: Habilitative services</li> <li>- 97: Rehabilitative services</li> </ul>
14	Documentation	1/1/2018		Update Appendix D to reference HCPCS codes that have SI values different from its APC SI value and impact to discounting (see Appendix D).
15	Logic	<b>10/1/2017</b>		Update program logic for PHP claims to return Payer-defined Condition Codes in the following instances: <ul style="list-style-type: none"> <li>- Return condition code MP if the PHP claim represents the initial admit week claim</li> <li>- Return condition code MQ if the PHP claim represents the final discharge week claim</li> </ul> Note: edit 95 is not returned on an initial admit week or a final discharge week of a PHP claim (see processing logic).
16	Logic	1/1/2018		Update program logic for critical care ancillary services to discontinue the modifier 59 logic exception for code 36600; code no longer identified as critical care ancillary service (see processing logic).
17	Documentation	1/1/2018		Add new payment adjustment flag value 22 (see Appendix G).
18	Content	1/1/2018		Update the following lists for the release (see quarterly data files):

#	Type	Effective Date	Edits Affected	Modification

## DEFINITIONS

- A blank in a field indicates 'no change'
- The "old" column describes the attribute prior to the change being made in the current update, which is indicated in the "new" column. If the effective date of the change is the same as the effective date of the new update, 'old' describes the attribute up to the last day of the previous quarter. If the effective date is retroactive, then 'old' describes the attribute for the same date in the previous release of the software.
- "Unassigned", "Pre-defined" or "Placeholder" in APC or HCPCS descriptions indicates that the APC or HCPCS code is inactive. When the APC or HCPCS code is activated, it becomes valid for use in the OCE, and a new description appears in the "new description" column, with the appropriate effective date.
- Activation Date (ActivDate) indicates the mid-quarter date of FDA approval for a drug, or the mid-quarter date of a new or changed code resulting from a National Coverage Determination (NCD). The Activation Date is the date the code becomes valid for use in the OCE. If the Activation Date is blank, then the effective date takes precedence.
- Termination Date (TermDate) indicates the mid-quarter date when a code or change becomes inactive. A code is not valid for use in the OCE after its termination date.
- For codes with SI of "Q1, Q2, and Q3", the APC assignment is the standard APC to which the code would be assigned if it is paid separately.
