APPENDIX B: PROJECTED IMPROPER PAYMENTS BY CLUSTER

Tables in this section of the appendix contain improper payment amounts for clusters. In the 2003 and 2004 reports, the CERT program provided error rates and improper payment amounts for each cluster. The MMA included a provision and additional funding to allow CMS to temporarily produce error rates at the individual contractor level, in addition to the cluster level rates, for the 2005 and 2006 reports. Beginning with the May 2007 Report, CERT reverts to reporting only cluster level error rates. Beginning with the November 2007 Report, clusters are listed for each contractor that adjudicated claims during the sampling period. There may be some contractors listed that no longer process claims for Medicare FFS. In addition, MACs which began their contracts during the sampling period are listed, but may have less than a full year of data.

Table B1a contains improper payment amounts for Carrier clusters. The table is sorted in descending order by projected improper payment amounts for Carrier cluster values.

APPENDIX C: ERROR RATES BY CLUSTER AND PROVIDER TYPE

Tables in this section of the appendix provide data by cluster. Each table in the appendix includes three error rates for each provider type that billed contractors in the cluster. The three error rates are:

- Paid/Allowed Claims Error Rate,
- Provider Compliance Error Rate (except FIs), and
- No Resolution Rate.

Information on dollars in error is also included in the tables. The table sort defaults to descending order by projected improper payments.
