

Public Reporting: Provider Preview Report and Requests for CMS Review of Data – Archive

Special Note about the COVID-19 Public Health Emergency (PHE): Due to the temporary exemption to the HQRP data submission requirements in response to the (coronavirus disease of 2019) COVID-19 PHE, public reporting of hospices' data was frozen after the November 2020 refresh. This means that since the November 2020 refresh, CMS has been holding the publicly reported data constant through the November 2021 refresh. Further, CMS has not been issuing Provider Preview Reports for those refreshes that continue to display constant or frozen data. CMS will resume public reporting and Provider Preview Reports with the February 2022 refresh. For additional information, please refer to the [FY 2022 Hospice Final Rule](#) on the [Hospice Center](#) page.

- Please note: Due to the COVID-PHE, CMS determined that they would not publicly report quality measures based on Q1 and Q2 2020 data; therefore, *data correction for these quarters is not necessary for public reporting.*
