\*For the 2015-2018 measurements, eligibility reviews were suspended. Therefore, eligibility component improper payment rates have been removed from these rates. 2019 represents the first cycle measured under the new PERM regulation (82 FR 31158). Cycles prior to 2015 were measured under the previous PERM eligibility methodology. Additionally, CMS began reporting the official rates to two decimal places in 2015. Cycles prior to 2015 had rates reported to one decimal place.

\*\*The overall estimate is comprised of the weighted sum of the FFS and managed care components, plus the eligibility component, minus a small adjustment to account for the overlap between the claims and eligibility review functions. From 2007-2013, the cycle-specific rate is calculated using data from the 17 states sampled and projected to the national level. From 2014 onward, the cycle-specific rate represents only the 17 states sampled. Additionally, multiple errors on a claim are not counted separately in this table and may not match other tables in the report.

\*\*\*Due to the COVID-19 PHE, CMS suspended all improper payment-related engagement/communication or data requests to providers and state agencies in April 2020. Effective August 11, 2020, CMS resumed PERM-related engagements with providers and states. CMS determined that, at the time of the PERM suspension, CMS had completed all data and documentation requests necessary to complete national reporting and did not resume any state or provider outreach. Due to the PHE impact, the Cycle 2-specific rates may not be comparable to other cycles.

<sup>4</sup> Percentages may not sum to 100.0% due to rounding. In this figure, monetary loss errors are prioritized over insufficient documentation errors, and total dollar amounts are benchmarked to the total improper payments found in Table S1 for Medicaid and T1 for CHIP. In addition, this figure reports Technically Improper Payments, a category included in the AFR and defined further in the “State-Specific Improper Payment Rates ...” section of this report. As a result, the methodology used in this figure may be different than that of other figures and tables in this report, which report every improper payment or are tabulated at the claim level. A full breakout of the values in this figure by monetary loss category can be found in Table S2A for Medicaid and T2A for CHIP.

Note: Details do not always sum to the total due to rounding. Additionally, multiple errors on a claim are not counted separately in this table and may not match other tables in the report.

\*Data Processing review is performed on all sampled FFS claims. However, not all sampled FFS claims receive a Medical Review, as certain exceptions apply where Medical Review is not able to be performed (Medicare Part A and Part B premiums, primary care case management payments, aggregate payments, other fixed payments, denied claims, and zero-paid claims). Of the 26,863 cases sampled, 22,048 were eligible for Medical Reviews.

**Table S2A. Medicaid Federal Improper Payments by Type of Improper Payment and Cause of Improper Payment**

Type of Improper Payment	Cause of Improper Payment	Federal Improper Payments (billions)	Percentage of Federal Improper Payments
Insufficient Documentation	Insufficient Information to determine eligibility	\$10.39	33.41%
	Non-Compliance with Provider Screening and NPI Requirements	\$4.08	13.12%
	Other Missing Information	\$5.09	16.38%
	Redetermination Not Conducted	\$3.43	11.03%
Monetary Loss	Beneficiary Ineligible for Program or Service Provided	\$4.85	15.59%
	Other Monetary Loss	\$0.90	2.90%
	Provider Not Enrolled	\$0.62	2.01%
Technically Improper	Technically Improper	\$1.60	5.16%
Underpayments	Underpayments	\$0.12	0.40%

Note: The table provides information on improper payments that are a known monetary loss to the program (i.e., provider not enrolled, incorrect coding, and other errors). In the table, “Insufficient Documentation” represents payments where there was no or insufficient documentation to support the payment as proper or a known monetary loss. For example, it represents claims where information was missing from the claim or states did not follow appropriate processes. These are payments where more information is needed to determine if the claims were payable or if they should be considered monetary losses to the program.

In this table, monetary loss errors are prioritized over insufficient documentation errors, and total dollar amounts are benchmarked to the total improper payments found in Table S1. In addition, this table reports Technically Improper Payments (defined further in the “State-Specific Improper Payment Rates ...” section of this report), and the methodology used in this table may be different than that of other figures and tables in this report.

**Table S2B. Medicaid Federal Improper Payments by Type of Improper Payment and Cause of Improper Payment**

Type of Improper Payment	Cause of Improper Payment	Federal Improper Payments (billions)	Percentage of Federal Improper Payments
Insufficient Documentation	Insufficient Information to determine eligibility	\$12.59	36.96%
	Non-Compliance with Provider Screening and NPI Requirements	\$4.91	14.43%

Monetary Loss	Beneficiary Ineligible for Program or Service Provided	\$4.90	14.39%
	Other Monetary Loss	\$0.90	2.64%
	Provider Not Enrolled	\$0.63	1.85%
Underpayments	Underpayments	\$0.15	0.43%

Note: The table provides information on improper payments that are a known monetary loss to the program (i.e., provider not enrolled, incorrect coding, and other errors). In the table, “Insufficient Documentation” represents payments where there was no or insufficient documentation to support the payment as proper or a known monetary loss. For example, it represents claims where information was missing from the claim or states did not follow appropriate processes. These are payments where more information is needed to determine if the claims were payable or if they should be considered monetary losses to the program.

In this table, every improper payment is counted, including where there are multiple errors per claim.

Overlaps between error categories are reported in all relevant categories, which may result in double counting in this table.

## Medical Review Federal Improper Payments: Document(s) Absent from Record Error (MR2)

The tables below include the types of documents and provider types associated with Document(s) Absent from Record Error (MR2). The cause of error is “One or more documents are missing from the record that are required to support payment.”

**Table S8. Medicaid FFS Specific Types of Document(s) Absent from Record**

Documentation Type	Total Count
Provider submitted the correct document type, but it was not applicable to the sampled DOS	106
Provider did not submit the individual plan (ITP, ISP, IFSP, IEP, or POC)	88
Provider did not submit required progress notes	76
Provider did not submit the required signed timesheet	27
Provider did not submit the regulatory 30/60-day physician visit note	21
Provider did not submit a physician’s order for the sampled service	19
Provider did not submit the signature page(s) pertaining to ITP, ISP, IFSP, IEP or POC	17
Provider did not submit the required supervision documentation	14
Provider did not submit the required documentation of daily presence	9
Other	6
Provider did not submit a medication administration record	4
Provider did not submit all postpartum/postnatal visit records	3
Provider did not submit diagnostic study (laboratory, X-ray, or pathology) results	3
Provider did not submit proof of delivery	2
Provider did not submit the required attendance log/census	2
Provider did not submit a valid prescription	1
Provider did not submit psychiatric/mental health evaluation	1
Provider did not submit the pharmacy signature log	1
Provider did not submit the required physician certification/recertification of services	1
Provider did not submit the school-based services service note (behavioral, medication administration, nursing, attendance record)	1
Provider did not submit transportation log	1
<b>Total</b>	<b>403</b>

Note: It is possible for a claim to have multiple documents absent, so one claim may be counted multiple times in this table.

Additionally, multiple errors on a claim are counted separately in this table and may not match tables that do not individually count these errors. Overlaps between error categories are reported in all relevant categories, which may result in double counting in this table. Further explanation of Data Processing error types can be found in Section 4: Error Codes, Table A2.

\*Deficiencies were no longer cited beginning in the RY 2024 cycle. Any deficiencies included in this report are from prior cycle results in rolling data.

Note: Details do not always sum to the total due to rounding. For denied claims or categories with fewer than two claims per sample stratum, a confidence interval is not calculated. For denied claims, there is also no improper payment rate calculated since there is no paid amount associated with the claim. Additionally, multiple errors on a claim are not counted separately in this table, except for the “Number of Errors” column. As a result, this table may not match other breakouts in the report.

## State-Specific Improper Payment Rates for the States Measured in 2024 Cycle 3

### Considerations for viewing state-specific PERM rates:

- What is included in PERM rates and represented in this table
  - **Three components** – PERM measures Fee-For-Service (FFS) payments made to providers, managed care capitation payments made to Managed Care Organizations (MCOs), and beneficiary eligibility determinations made by state agencies and combines them to form the overall rate per state. The overall improper payment rate is computed by proportionally combining the FFS and managed care components based on expenditures for each component (the claims rate), then adding the eligibility component and subtracting out the overlap between the claims and eligibility component. Because of this, you cannot simply average the three components to reach the overall rate.
  - **Three cycles** – PERM measures on a three-year, 17 state rotation cycle, meaning that each state is measured once every three years and each PERM cycle measurement includes one third of all states. The most recent three cycles combine to form each year’s overall national rate.
  - **Sample vs projection** –
    - *Sample improper payments* – The improper payments associated with the actual reviewed sample of claims. These are then extrapolated out to represent the entire universe of claims (the projected improper payments). The federal share of the sampled overpayments is the only portion that CMS has the authority to recover from the FFS and managed care universes.
    - *Projected improper payments* – The estimated improper payments used for national reporting to represent the entire Medicaid program (derived by projecting out the actual sampled improper payments to represent all Medicaid improper payments).
  - **Insufficient Documentation vs Monetary Loss Errors** –
    - *Insufficient Documentation Errors* – Improper payments also include instances where there is insufficient or no documentation to support the payment as proper or improper. A majority of Medicaid improper payments were due to instances where information required for payment or eligibility determination was missing from the claim or state systems (e.g., not properly saving documentation after verification) and/or states did not follow the appropriate process for enrolling providers and/or determining beneficiary eligibility. However, these improper payments do not necessarily represent payments to incorrect providers or beneficiaries. If the missing information had been on the claim and/or had the state complied with the enrollment or redetermination requirements, then the claims may have been payable.
    - *Monetary Loss Errors* – Instances of monetary loss errors occur when CMS has sufficient information to determine that the Medicaid payment should not have occurred or should have been made in a different amount. Monetary loss errors represent a smaller proportion of Medicaid improper payments.
  - **Technically Improper Payments** –
    - In 2023 and 2024, the review contractors have been working independently and with states to verify certain situations where documentation to support state action could not be provided. This process includes reviewing databases related to provider enrollment requirements and/or eligibility determination information to evaluate if a provider or beneficiary would have been eligible to provide or receive services, had the state properly documented its required actions to confirm eligibility or enrollment requirements. While any findings related to this additional step of independent verification did not change the actual finding of the PERM review, if the contractor is able to confirm that the provider or beneficiary would have been eligible to be enrolled, these findings will be considered technically improper. Appendix C of the Office of Management and Budget (OMB) A-123 Circular defines “A ‘technically improper’ payment as a payment to the right recipient for the right amount and therefore does not result in the need for the program to recover funds due to overpayment.” Technically improper payments will not be included on the state’s Final

Errors for Recovery, or FEFRR, report. Therefore, recovery of funds for the overpayment will not be required. However, an overpayment recovery may still be assessed if a medical review error or a separate data processing error also exists on the claim. The state will still be required to respond to technically improper payments within their Corrective Action Plan (CAP).

- **State-specific Improper Payment Rates Are Not Comparable**

States have flexibility to design their policies and operate their programs to meet the individual needs of the state, such as establishing a managed care delivery system rather than relying on FFS. Variation between states and the resulting methodological differences between states' PERM rates makes it impossible to accurately compare state-specific PERM rates between states. Additional reasons include:

- *Eligibility Measurement* – CMS established a baseline measurement of all 50 states and the District of Columbia in 2021, which allows CMS to measure the progress made by states since they were last reviewed, and target areas for additional oversight. Due to the PHE, Cycle 2 states did not receive state-specific rates or reports in RY20. Therefore, states in Cycle 2 have not yet had the opportunity to be measured a second time and show improved compliance with the new requirements. Cycle 1 and Cycle 3 states have been measured a second time under the new eligibility requirements.
- *COVID-19 Flexibilities Afforded to States* – Given the timing of the PHE, each cycle of states was impacted differently by the associated flexibilities afforded to states, such as postponed eligibility determinations and reduced requirements around provider enrollment or revalidations. Depending on when these flexibilities were lifted, they could also impact future cycle rates differently, potentially leading to higher rates as the flexibilities may no longer be in place. Please note that the 2024 cycle data does not capture any significant effect of the PHE unwinding, as it will be more prevalent in future report periods.
- *State-level precision/confidence interval* – The national PERM rate is established by capturing a statistically valid random sample representative of all Medicaid payments matched with federal funds. The national PERM improper payment rate meets a national precision requirement where CMS is 95 percent confident that the Medicaid improper payment rate is within +/- 3 percentage points. The PERM program was not designed to produce that level of precision at the state level. Therefore, state-level precision can vary, leading to wider confidence intervals in some states.
- *Program structure* – PERM has historically seen a lower instance of improper payments in managed care than FFS, based on differences in the review standards that apply to claims from the two service delivery models. Due to the differing review methodology, states' rates are often not comparable due to the varying distribution between FFS and managed care expenditures.
  - The definition of a FFS delivery system used below includes states' direct payment to providers for each service rendered to individual beneficiaries. Managed care is a delivery system in which a state makes a risk-based monthly capitated payment to a managed care organization, prepaid inpatient health plan, or prepaid ambulatory health plan, which is responsible for managing beneficiary care. Each FFS claim selected undergoes a medical and data processing review, while managed care payments are subjected to a data processing review.
- *State Policies* – Policies vary by state, which leads to differences in the states' specific Medicaid rates. These varying policies may include medical documentation and coverage requirements, integration and coordination of payment and eligibility systems, and prioritization of resources based on budget limitation.

- **Other Considerations**

- Some states rely solely on FFS and do not have a managed care program at all (those states are marked with "--" in the managed care columns).
- 79% of Medicaid estimated improper payments in RY 2024 were those with insufficient documentation. These include improper payments with no documentation and insufficient documentation (such as failing to submit or maintain the appropriate documentation for someone who *may* be eligible for care). To provide more meaningful improper payment data about the no documentation and insufficient documentation errors, CMS is implementing PERM independent review verifications to verify, for example, if the beneficiary was truly eligible, even if the state did not document or perform the required eligibility or provider enrollment

verification. As part of these efforts in RY 2024, it was determined that ~5% of insufficient documentation errors were considered to be technically improper payments.

### Section 3: 2024 Supplemental CHIP Federal Improper Payment Data

CMS reported a rolling federal improper payment rate for CHIP in 2024 based on the 50 states and the District of Columbia reviewed from 2022-2024. Unless otherwise noted, all tables and figures in Section 3 are based on the rolling rate.

<b>Total</b>	<b>1,904</b>	<b>30,062</b>	<b>\$2,913,092.40</b>	<b>\$75,590,179.58</b>	<b>\$1,074.00</b>	<b>\$17,587.75</b>	<b>6.11%</b>	<b>5.35% - 6.87%</b>

Note: Details do not always sum to the total due to rounding. Additionally, multiple errors on a claim are not counted separately in this table and may not match other tables in the report.

\*Data Processing review is performed on all sampled FFS claims. However, not all sampled FFS claims receive a Medical Review, as certain exceptions apply where Medical Review is not able to be performed (Medicare Part A and Part B premiums, primary care case management payments, aggregate payments, other fixed payments, denied claims, and zero-paid claims). Of the 16,171 cases sampled, 14,023 were eligible for Medical Reviews.

**Table T2A. CHIP Federal Improper Payments by Type of Improper Payment and Cause of Improper Payment**

Type of Improper Payment	Cause of Improper Payment	Federal Improper Payments (billions)	Percentage of Federal Improper Payments
Insufficient Documentation	Insufficient Information to determine eligibility	\$0.23	21.16%
	Non-Compliance with Provider Screening and NPI Requirements	\$0.08	7.38%
	Other Missing Information	\$0.08	7.48%
	Redetermination Not Conducted	\$0.22	20.71%
Monetary Loss	Beneficiary Ineligible for Program or Service Provided	\$0.28	25.71%
	Other Monetary Loss	\$0.12	11.12%
	Provider Not Enrolled	\$0.01	1.39%
Technically Improper	Technically Improper	\$0.05	4.82%
Underpayments	Underpayments	\$0.00	0.23%

Note: The table provides information on improper payments that are a known monetary loss to the program (i.e., provider not enrolled, incorrect coding, and other errors). In the table, “Insufficient Documentation” represents payments where there was no or insufficient documentation to support the payment as proper or a known monetary loss. For example, it represents claims where information was missing from the claim or states did not follow appropriate processes. These are payments where more information is needed to determine if the claims were payable or if they should be considered monetary losses to the program.

In this table, monetary loss errors are prioritized over insufficient documentation errors, and total dollar amounts are benchmarked to the total improper payments found in Table T1. In addition, this table reports Technically Improper Payments (defined further in the “State-Specific Improper Payment Rates ...” section of this report), and the methodology used in this table may be different than that of other figures and tables in this report.

**Table T2B. CHIP Federal Improper Payments by Type of Improper Payment and Cause of Improper Payment**

Type of Improper Payment	Cause of Improper Payment	Federal Improper Payments (billions)	Percentage of Federal Improper Payments
Insufficient Documentation	Insufficient Information to determine eligibility	\$0.28	23.93%
	Non-Compliance with Provider Screening and NPI Requirements	\$0.12	10.21%
	Other Missing Information	\$0.11	9.43%
	Redetermination Not Conducted	\$0.25	20.65%
Monetary Loss	Beneficiary Ineligible for Program or Service Provided	\$0.29	24.06%
	Other Monetary Loss	\$0.12	10.16%
	Provider Not Enrolled	\$0.02	1.27%
Underpayments	Underpayments	\$0.00	0.28%

Note: The table provides information on improper payments that are a known monetary loss to the program (i.e., provider not enrolled, incorrect coding, and other errors). In the table, “Insufficient Documentation” represents payments where there was no or insufficient documentation to support the payment as proper or a known monetary loss. For example, it represents claims where information was missing from the claim or states did not follow appropriate processes. These are payments where more information is needed to determine if the claims were payable or if they should be considered monetary losses to the program.

In this table, every improper payment is counted, including where there are multiple errors per claim.

Note: Details do not always sum to the total due to rounding. For denied claims or categories with fewer than two claims per sample stratum, a confidence interval is not calculated. For denied claims, there is also no improper payment rate calculated since there is no paid amount associated with the claim. Additionally, multiple errors on a claim are not counted separately in this table, except for the “Number of Errors” column. As a result, this table may not match other breakouts in the report.

Note: Details do not always sum to the total due to rounding. For error causes with fewer than two claims per sample stratum, a confidence interval is not calculated. Additionally, multiple errors on a claim are counted separately in this table and may not match tables that do not individually count these errors. Overlaps between error categories are reported in all relevant categories, which may result in double counting in this table.

## Medical Review Federal Improper Payments: Document(s) Absent from Record Error (MR2)

The tables below include the types of documents and provider types associated with Document(s) Absent from Record Error (MR2). The cause of error is “One or more documents are missing from the record that are required to support payment.”

**Table T8. CHIP FFS Specific Types of Document(s) Absent from Record**

Documentation Type	Total Count
Provider did not submit the individual plan (ITP, ISP, IFSP, IEP, or POC)	35
Provider did not submit required progress notes	20
Provider submitted the correct document type, but it was not applicable to the sampled DOS	14
Provider did not submit a physician’s order for the sampled service	10
Provider did not submit all antepartum/prenatal visit records	6
Provider did not submit all postpartum/postnatal visit records	5
Provider did not submit the required signed timesheet	4
Other	3
Provider did not submit the signature page(s) pertaining to ITP, ISP, IFSP, IEP or POC	3
Provider did not submit the therapy visit notes (PT/OT/ST)	3
Provider did not submit diagnostic study (laboratory, X-ray, or pathology) results	2
Provider did not submit proof of delivery	2
Provider did not submit documentation of patient counseling provided or patient refusal to counseling	1
Provider did not submit psychiatric/mental health evaluation	1
Provider did not submit the face-to-face assessment documentation	1
Provider did not submit the school-based services service note (behavioral, medication administration, nursing, attendance record)	1
Provider did not submit transportation log	1
<b>Total</b>	<b>112</b>

Note: It is possible for a claim to have multiple documents absent, so one claim may be counted multiple times in this table.

Note: Details do not always sum to the total due to rounding. For denied claims or categories with fewer than two claims per sample stratum, a confidence interval is not calculated. For denied claims, there is also no improper payment rate calculated since there is no paid amount associated with the claim. Additionally, multiple errors on a claim are not counted separately in this table, except for the “Number of Errors” column. As a result, this table may not match other breakouts in the report.

Note: Details do not always sum to the total due to rounding. For error types with fewer than two claims per sample stratum, a confidence interval is not calculated. Additionally, multiple errors on a claim are counted separately in this table and may not match tables that do not individually count these errors. Overlaps between error categories are reported in all relevant categories, which may result in double counting in this table. Further explanation of Eligibility Review error types can be found in Section 4: Error Codes, Table A3. There were no underpayments cited, so only overpayments are reported in this table.

\*Deficiencies (ERTDs) were no longer cited beginning in the RY 2024 cycle. Any deficiencies included in this report are from prior cycle results in rolling data.

## Section 4: Error Codes/Glossaries

**Table A1. Medical Review Error Codes**

Error Code	Error	Definition
MR1	No Documentation Error	The provider failed to respond to requests for the medical records or the provider responded that he or she did not have the requested documentation or the provider did not send any documentation related to the sampled payment (i.e., wrong date of service, wrong beneficiary).
MR2	Document(s) Absent from Record Error	The submitted medical documentation is missing required documents, making the record insufficient to support payment for the services billed. The provider submitted some documentation, but the documentation is inconclusive to support the billed service.
MR3	Procedure Coding Error	The medical service, treatment, and/or equipment was medically necessary and was provided at the proper level of care, but was billed and paid based on a wrong procedure code.
MR4	Diagnosis Coding/DRG Error	According to the medical record, the principal diagnosis code was incorrect or the payer paid for an incorrect DRG, resulting in a payment error.
MR5	Unbundling Error	A set of medical services was provided and billed as separate services when a CMS regulation, policy, or local practice dictates that the services should have been billed as a set.
MR6	Number of Unit(s) Error	The number of units billed by the provider were not supported in the record documentation.
MR7	Medically Unnecessary Service Error	There is sufficient documentation in the records for the reviewer to make an informed decision that the medical services or products were not medically necessary.
MR8	Policy Violation Error	The billed service or procedure did not comply with a documented policy that applied to the service or procedure at the time it was performed and/or billed.
MR9	Improperly Completed Documentation Error	The required forms and documents are present in the record, but are inadequately completed to verify that the services were provided in accordance with applicable policy or regulation.
MR10	Administrative/Other Error	MR determined a payment error, but the error does not fit into one of the other MR error categories.
<i>MTD*</i>	<i>Medical Technical Deficiency</i>	<i>An identified instance of noncompliance with state policy during a case review that does not result in a difference between the amount paid and the amount that should have been paid (i.e., an improper payment).</i>

\*Note: Error codes are retired and no longer in use.

**Table A2. Data Processing Error Codes**

<b>Error Code</b>	<b>Error</b>	<b>Definition</b>
DP1	Duplicate Claim Error	The sampled line item/claim or capitation payment is an exact duplicate of another line item/claim or capitation payment that was previously paid. Services on a sampled claim conflict with services on another claim during the same DOS.
DP2	Non-Covered Service/Beneficiary Eligibility/MMIS System Error	The state’s policy indicates that the service billed on the sampled claim is not payable by the Medicaid or CHIP programs and/or the beneficiary eligibility status is not consistent between the eligibility source system and MMIS for the coverage category for the service.
DP3	FFS Payment for a Managed Care Service Error	The beneficiary is enrolled in a MCO that includes the service on the sampled claim under capitated benefits, but the state inappropriately paid for the sampled service.
DP4	Third-Party Liability Error	Medicaid/CHIP paid the service on the sampled claim as the primary payer, but a third-party carrier should have paid for the service.
DP5	Pricing Error	The payment for the service does not correspond with the pricing schedule on file and in effect for the DOS on the claim.
<i>DP6*</i>	<i>System Logic Edit Error</i>	<i>The system did not contain the edit that was necessary to properly administer state policy or the system edit was in place, but was not working correctly and the sampled line item/claim was paid inappropriately.</i>
<i>DP7*</i>	<i>Data Entry Error</i>	<i>The sampled line item/claim was paid in error due to clerical errors in the data entry of the claim.</i>
DP8	Managed Care Rate Cell Error	The beneficiary was enrolled in managed care on the sampled DOS and assigned to an incorrect rate cell, resulting in payment made according to the wrong rate cell.
DP9	Managed Care Payment Error	The beneficiary was enrolled in managed care and assigned to the correct rate cell, but the amount paid for that rate cell was incorrect.
DP10	Provider Information/Enrollment Error	The provider was not enrolled in Medicaid/CHIP according to federal regulations and state policy or required provider information was missing from the sampled claim.
DP11	Claim Filed Untimely	The sampled claim was not filed in accordance with the timely filing requirements defined by state policy.
DP12	Administrative/Other Error	A payment error was discovered during data processing review, but the error was not a DP1 – DP11 error.
<i>DTD*</i>	<i>Data Processing Technical Deficiency</i>	<i>An RBS provider enrollment deficiency was found during data processing review that did not result in a payment error.</i>

\*Note: Error codes are retired and no longer in use.

**Table A3. Eligibility Error Codes**

<b>Error Code</b>	<b>Error</b>	<b>Definition</b>
ER1	Documentation to Support Eligibility Determination Not Maintained; Unable to Determine Beneficiary Eligibility	The state cannot provide documentation obtained during the state's eligibility determination. Evidence within the eligibility case file or eligibility system indicates that the state verified the eligibility element using an appropriate verification source during the state's eligibility determination, but the documentation of the verification source was not maintained. The beneficiary under review may be financially and categorically eligible but eligibility cannot be confirmed without the documentation.
ER2	Verification of Eligibility Element Not Done/Required Documentation Not Collected at the Time of Determination; Unable to Determine Beneficiary Eligibility	The state cannot provide documentation obtained during the state's eligibility determination. In addition, the state cannot provide evidence the state obtained documentation from an appropriate verification source during the state's eligibility determination. The beneficiary under review may be financially and categorically eligible, but eligibility cannot be confirmed without the documentation.
ER3	Determination Not Conducted as Required; Unable to Determine Beneficiary Eligibility	The state could not provide evidence that the state conducted an eligibility determination or completed a timely redetermination.
ER4	Not Eligible for Enrolled Program; Financial Issue	The beneficiary is not eligible to receive coverage under the enrolled program (i.e., Medicaid or CHIP) due to an incorrect caseworker or system action relating to the financial elements of the eligibility determination.
ER5	Not Eligible for Enrolled Program; Non-Financial Issue	The beneficiary is not eligible to receive coverage under the enrolled program (i.e., Medicaid or CHIP) due to an incorrect caseworker or system action relating to the non-financial elements of the eligibility determination.
ER6	Should Have Been Enrolled in a Different Program (i.e., Medicaid or CHIP)	The beneficiary is not eligible for the enrolled program (i.e., Medicaid or CHIP), but is eligible for the other program.
ER7	Not Eligible for Enrolled Eligibility Category; Resulting in Incorrect Federal Medical Assistance Percentage (FMAP) Assignment	The beneficiary is assigned to the correct program (i.e., Medicaid or CHIP), but is enrolled in an incorrect eligibility category within the program, which results in an incorrect FMAP assignment for the beneficiary.
ER8	Not Eligible for Enrolled Eligibility Category; Ineligible for Service Provided	The beneficiary is assigned to the correct program (i.e., Medicaid or CHIP), but is enrolled in an incorrect eligibility category, which results in the individual receiving services for which they were not eligible.
ER9	Federally-Facilitated Exchange-Determination (FFE-D) Error	Not applicable to states calculated error rate, but applies to national error rate based upon Federal Exchange decisions; used for errors when the FFE incorrectly determined eligibility for the beneficiary.
ER10	Other Errors	The beneficiary is improperly denied or terminated, or the contribution to care calculation is incorrectly calculated, or the beneficiary is eligible for emergency services only.
<i>ERTD1*</i>	<i>Incorrect Case Determination, But There was No Payment on Claim</i>	<i>The beneficiary is ineligible for any of the reasons cited in the ER1 – ER10, but no payment was made for the claim.</i>
<i>ERTD2*</i>	<i>Finding Noted With Case, But Did Not Affect Case Determination or Payment</i>	<i>The state completed an eligibility determination that was not in accordance with timeliness standards, but was completed before the claim date of payment, or an “other” finding was noted that does not impact claims payment.</i>

\*Note: Error codes are retired and no longer in use.

**Table A4. Eligibility Root Cause Glossary**

<b>Root Cause</b>	<b>Definition</b>
Caseworker	The determination under review had some elements that were completed by a caseworker and the finding related to the caseworker’s actions.
System	The determination under review had some elements that were completed by a system and the finding related to a system action or indicator.
Multiple	The determination under review had elements that were completed, used, or significantly affected by some combination of the caseworker, system, and/or state policy. The finding is related to a process that was directly affected by more than one cause in the combination.
Policy	The state policy around the finding was not in compliance with Federal Regulation or other regulatory guidance; however, in the determination under review, the system actions were completed as expected and/or the caseworker followed all state policies correctly.
Unable to Determine	The ERC was unable to identify the root cause of what led to this error.

**Table A5. Eligibility Case Action Glossary**

<b>Case Action</b>	<b>Definition</b>
Application	Last action was a result of processing an application submitted to the state.
Redetermination	Last action was a result of processing a redetermination submitted to the state or when a redetermination was not completed timely.
Change	Last action was a result of processing a change (change in income, household, etc.) communicated to the state.
Not Applicable	No specific case action to review. This classification applies to cases like SSI and Title IV-E cases, or other case types that are not determined eligible by the Medicaid agency. Cases with a termination action are also coded with a Not Applicable case action.
Unknown	Case actions could not be identified. This classification applies to cases in which it is unclear what type of case action was made to grant eligibility for the date of service.
