

Default Enrollment

Policy and Data on Approved Medicare Advantage Plans

September 30, 2024

Default enrollment was authorized in section 1851(c)(3) of the Social Security Act as part of the Balanced Budget Act of 1997. This provision gives the Secretary the authority to establish procedures for enrolling individuals from their current healthcare coverage into a Medicare Advantage (MA) plan offered by the same organization as of the first day their Medicare coverage starts, if they do not elect to receive Medicare coverage in another way. The Centers for Medicare and Medicaid Services (CMS) codified the default enrollment process (CMS 4182-F, 83 CFR 16495 through 16502)¹ and specified the scope to include enrollments of an organization's Medicaid managed care enrollees into an affiliated dual eligible special needs plan (D-SNP) upon the individuals' initial eligibility for Medicare. Organizations meeting these requirements that wish to begin using this enrollment process submit proposals to CMS via the Health Plan Management System module.

Regulation §422.66(c)(2) stipulates the parameters for MA organizations that wish to use this optional enrollment mechanism. An MA organization must submit a proposal to CMS for review and approval prior to effectuating any default enrollments. The proposal must address all aspects of the default enrollment mechanism specified in the regulation, including information on the Medicaid managed care plan from which newly eligible Medicare beneficiaries will be default enrolled, as well as the D-SNP into which these individuals will be default enrolled.

MA organizations interested in applying for default enrollment must also have a minimum overall quality rating of at least 3 stars in the most recently published data (or not have a Star Rating because it is a low enrollment contract or is a new MA plan), and not have any prohibition on new enrollment imposed by CMS. The MA organization must also be able to identify both those becoming Medicare-eligible because of age and disability in the Medicaid managed care plan. At least 60 days before enrollment, the MA organization must issue a written notice to individuals being default-enrolled into the D-SNP that explains their right to opt-out, their other Medicare coverage options, and the process for obtaining care in the D-SNP.

As of September 30, 2024, CMS approved 28 parent organizations, encompassing 81 separate plans in 56 MA contracts in 15 states and Puerto Rico to use the default enrollment mechanism. Most are submitting default enrollment transactions, but those newly approved may still be implementing this process.

The chart below outlines the MA organizations that are currently approved to offer default enrollment, including the contract and plan benefit package (PBP) numbers as well as the state. For the 2023 plan year, MA organizations approved to offer default enrollment submitted 27,161 default enrollment transactions. This is a 23 percent decrease from 2022.
