	<b>Change Request 12290</b>			

SUBJECT: National Coverage Determination (NCD) 20.9.1 Ventricular Assist Devices (VADs)

**I. SUMMARY OF CHANGES:** The purpose of this Change Request is to inform contractors that effective December 1, 2020, CMS covers Ventricular Assist Devices (VADs) under certain conditions and criteria.

#### **EFFECTIVE DATE: December 1, 2020**

\*Unless otherwise specified, the effective date is the date of service.

**IMPLEMENTATION DATE: July 27, 2021** 

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

#### III. FUNDING:

#### For Medicare Administrative Contractors (MACs):

The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

**Business Requirements Manual Instruction** 

# **Attachment - Business Requirements**

**SUBJECT: National Coverage Determination (NCD) 20.9.1 Ventricular Assist Devices (VADs)** 

**EFFECTIVE DATE: December 1, 2020** 

\*Unless otherwise specified, the effective date is the date of service.

**IMPLEMENTATION DATE: July 27, 2021** 

#### I. GENERAL INFORMATION

**A. Background:** Ventricular assist devices (VADs) or left ventricular assist devices (LVADs) are mechanical blood pumps that are surgically attached to one or both intact ventricles of a damaged or weakened native heart to assist in pumping blood. The heart remains intact with VADs with the possibility for the native heart to recover and for removal of the device. Patients who may be candidates for LVAD implant undergo extensive clinical testing to ensure an adequate severity of heart failure but acceptable severity of comorbidities.

Section 20.9.1 of the Medicare National Coverage Determinations (NCD) Manual establishes conditions of coverage for VADs. In 1993, the Centers for Medicare & Medicaid Services (CMS) first issued an NCD providing limited coverage of VADs and the policy has been expanded over the years. CMS last reconsidered this NCD in 2013.

#### **B. Policy:** Advanced Heart Failure

Left ventricular assist devices (LVADs) are covered if they are FDA approved for short-term (e.g., bridge-to-recovery and bridge-to-transplant) or long-term (e.g., destination therapy) mechanical circulatory support for heart failure patients who meet the following criteria:

Have New York Heart Association (NYHA) Class IV heart failure; and Have a left ventricular ejection fraction (LVEF)  $\leq$  25%; and Are inotrope dependent OR

have a Cardiac Index (CI) [ 2.2 L/min/m2, while not on inotropes, and also meet one of the following:

Are on optimal medical management (OMM), based on current heart failure practice guidelines for at least 45 out of the last 60 days and are failing to respond; or

Have advanced heart failure for at least 14 days and are dependent on an intra-aortic balloon pump (IABP) or similar temporary mechanical circulatory support for at least 7 days.

Beneficiaries receiving a VAD must be managed by an explicitly identified, cohesive, multidisciplinary team of medical professionals with appropriate qualifications, training, and experience. The team embodies collaboration and dedication across medical specialties to offer optimal patient-centered care. Collectively, the team must ensure that patients and caregivers have the knowledge and support necessary to participate in informed decision making. The team members must be based at the facility and must include individuals with experience working with patients before and after placement of a VAD.

The team must include, at a minimum:

- At least one physician with cardiothoracic surgery privileges and individual experience implanting at least 10 durable, intracorporeal, left ventricular assist devices over the course of the previous 36 months with activity in the last year.
- At least one cardiologist trained in advanced heart failure with clinical competence in medical- and device-based management including VADs, and clinical competence in the management of patients before and after placement of a VAD.
- A VAD program coordinator.
- A social worker.
- A palliative care specialist.

The process for organizations to apply for CMS approval to be designated as a credentialing organization for VAD facilities is posted on our web site along with a list of approved credentialing organizations, approved standard versions, and credentialed facilities: http://www.cms.gov/Medicare/Medicare-General-Information/MedicareApprovedFacilitie/VAD-Destination-Therapy-Facilities.html

**Post-Implementation Contact(s):** Contact your Contracting Officer's Representative (COR).

#### VI. FUNDING

#### **Section A: For Medicare Administrative Contractors (MACs):**

The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

#### **ATTACHMENTS: 1**

#### 320 - Artificial Hearts and Related Devices

(Rev. 10837; Issued: 06-11-21; Effective: 12-01-20; Implementation: 07-27-21)

Effective for claims with dates of service on or after December 1, 2020, as a result of a reconsideration of National Coverage Determination (NCD) 20.9 of the Medicare NCD Manual, coverage determinations for artificial hearts and related devices shall be made by the Medicare Administrative Contractors.

# 320.3 – Ventricular Assist Devices (VADs)

(Rev. 10837; Issued: 06-11-21; Effective: 12-01-20; Implementation: 07-27-21)

Medicare may cover a Ventricular Assist Device (VAD). A VAD is surgically attached to one or both intact ventricles and is used to assist or augment the ability of a damaged or weakened native heart to pump blood. Improvement in the performance of the native heart may allow the device to be removed. Refer to the *Internet Only Manual Publication* 100-03, *National Coverage Determination (NCD) Manual, section 20.9.1*, for coverage criteria.

# 320.3.1 – Post-Cardiotomy

(Rev. 10837; Issued: 06-11-21; Effective: 12-01-20; Implementation: 07-27-21)

Post-cardiotomy is the period following open-heart surgery. VADs used for support of blood circulation post-cardiotomy are covered only if they have received approval from the Food and Drug Administration (FDA) for that purpose, and the VADs are used according to the FDA-approved labeling instructions.

320.3.2 – VADs for Short-term or Long-term Mechanical Circulatory Support (Rev. 10837; Issued: 06-11-21; Effective: 12-01-20; Implementation: 07-27-21)

Effective for claims with dates of service on or after December 1, 2020, Left ventricular assist devices (LVADs) are covered if they are FDA-approved for short-term (e.g., bridge-to-recovery and bridge-to-transplant) or long-term (e.g., destination therapy) mechanical circulatory support for heart failure patients who meet specific clinical criteria outlined in NCD 20.9.1.

#### 320.3.3 – Other

(Rev. 10837; Issued: 06-11-21; Effective: 12-01-20; Implementation: 07-27-21)

All other indications for the use of VADs not otherwise listed remain non-covered, except in the context of Category B investigational device exemption clinical trials (42 CFR 405) or as a routine cost in clinical trials defined under section 310.1 of the NCD Manual.

#### **Claims Coding**

Appropriate ICD-10 diagnosis and procedure codes are included below:

ICD-10	Definition
Diagnosis Code	
109.81	Rheumatic heart failure
111.0	Hypertensive heart disease with heart failure

l13.0	Hypertensive heart and chronic kidney disease with heart failure and stage 1 through stage 4 chronic kidney disease,
115.0	or unspecified chronic kidney disease
113.2	Hypertensive heart and chronic kidney disease with heart failure and with stage 5 chronic kidney disease, or end
120.0	stage renal disease
120.0	Unstable angina
121.01	ST elevation (STEMI) myocardial infarction involving left main coronary artery
	ST elevation (STEMI) myocardial infarction involving left
121.02	anterior descending coronary artery
	ST elevation (STEMI) myocardial infarction involving
121.09	other coronary artery of anterior wall
	ST elevation (STEMI) myocardial infarction involving
121.11	right coronary artery
	ST elevation (STEMI) myocardial infarction involving
121.19	other coronary artery of inferior wall
	ST elevation (STEMI) myocardial infarction involving left
121.21	circumflex coronary artery
	ST elevation (STEMI) myocardial infarction involving
121.29	other sites
	ST elevation (STEMI) myocardial infarction of
121.3	unspecified site
121.4	Non-ST elevation (NSTEMI) myocardial infarction
	Subsequent ST elevation (STEMI) myocardial infarction
122.0	of anterior wall
	Subsequent ST elevation (STEMI) myocardial infarction
122.1	of inferior wall

	Subsequent non-ST elevation (NSTEMI) myocardial
122.2	infarction
	Subsequent ST elevation (STEMI) myocardial infarction
122.8	of other sites
122.9	Subsequent ST elevation (STEMI) myocardial infarction of unspecified site
	Acute coronary thrombosis not resulting in myocardial
124.0	infarction
124.1	Dressler's syndrome
124.8	Other forms of acute ischemic heart disease
124.9	Acute ischemic heart disease, unspecified
	Atherosclerotic heart disease of native coronary artery
125.10	without angina pectoris
	Atherosclerotic heart disease of native coronary artery
125.110	with unstable angina pectoris
	Atherosclerotic heart disease of native coronary artery
125.111	with angina pectoris with documented spasm
	<u> </u>

125.710	graft(s) with unstable angina pectoris
	Atherosclerosis of autologous vein coronary artery bypass
125.709	unspecified, with unspecified angina pectoris
	Atherosclerosis of coronary artery bypass graft(s),
125.708	unspecified, with other forms of angina pectoris
	Atherosclerosis of coronary artery bypass graft(s),
125.701	unspecified, with angina pectoris with documented spasm
	Atherosclerosis of coronary artery bypass graft(s),
125.700	unspecified, with unstable angina pectoris
	Atherosclerosis of coronary artery bypass graft(s),
125.6	Silent myocardial ischemia
125.5	Ischemic cardiomyopathy
125.119	with unspecified angina pectoris
	Atherosclerotic heart disease of native coronary artery
125.118	with other forms of angina pectoris
	Atherosclerotic heart disease of native coronary artery

	Atherosclerosis of autologous vein coronary artery bypass
125.711	graft(s) with angina pectoris with documented spasm
	Atherosclerosis of autologous vein coronary artery bypass
125.718	graft(s) with other forms of angina pectoris
	Atherosclerosis of autologous vein coronary artery bypass
125.719	graft(s) with unspecified angina pectoris
	Atherosclerosis of autologous artery coronary artery
125.720	bypass graft(s) with unstable angina pectoris
	Atherosclerosis of autologous artery coronary artery
125.721	bypass graft(s) with angina pectoris with documented spasm
	Atherosclerosis of autologous artery coronary artery
125.728	bypass graft(s) with other forms of angina pectoris
	Atherosclerosis of autologous artery coronary artery
125.729	bypass graft(s) with unspecified angina pectoris
	Atherosclerosis of nonautologous biological coronary artery
125.730	bypass graft(s) with unstable angina pectoris
	Atherosclerosis of nonautologous biological coronary artery
125.731	bypass graft(s) with angina pectoris with
	documented spasm
	Atherosclerosis of nonautologous biological coronary
125.738	artery bypass graft(s) with other forms of angina pectoris
	Atherosclerosis of nonautologous biological coronary
125.739	artery bypass graft(s) with unspecified angina pectoris
	Atherosclerosis of native coronary artery of transplanted
125.750	heart with unstable angina
	Atherosclerosis of native coronary artery of transplanted
125.751	heart with angina pectoris with documented spasm
	Atherosclerosis of native coronary artery of transplanted

This policy does not address coverage of VADs for right ventricular support, biventricular support, use in beneficiaries under the age of 18, use in beneficiaries with complex congenital heart disease, or use in beneficiaries with acute heart failure without a history of chronic heart failure. Coverage under section 1862(a) (1) (A) of the Social Security Act for VADs in these situations will be made by local Medicare Administrative Contractors (MACs) within their respective jurisdictions.

# 320.3.4— Replacement Accessories and Supplies for External VADs or Any VAD

(Rev. 10837; Issued: 06-11-21; Effective: 12-01-20; Implementation: 07-27-21)

Effective April 1, 2013, claims for replacement of accessories and supplies for VADs implanted in patients who were not eligible for coverage under Medicare Part A or had other insurance that paid for the device and hospital stay at the time that the device was implanted, but are now eligible for coverage of the replacement supplies and accessories under Part B, should be submitted using HCPCS code Q0509. Those claims will be manually reviewed.

In rare instances it may be appropriate to pay for replacement of supplies and accessories for external VADs used by patient who are discharged from the hospital. In addition, in some rare instances, it may be necessary for a patient to have an emergency back-up controller for an external VAD. Coverage of these items is at the discretion of the contractor. Claims for replacement of supplies and accessories used with an external VAD that are furnished by suppliers should be billed to the Part B MACs. Claims for replacement of supplies and accessories used with an external VAD that are furnished by hospitals and other providers should be billed to the Part AMACs. Effective April 1, 2013, these items should be billed using code Q0507 so that the claims can be manually reviewed.

Claims for replacement supplies or accessories used with VADs that do not have specific HCPCS codes and do not meet the criteria of codes Q0507 and Q0509 should be billed using code Q0508.

### **Claims Coding**

HCPCS	Definition	Effective Date
Q0507	Miscellaneous Supply Or Accessory For Use With An External Ventricular Assist Device	April 1, 2013
Q0508	Miscellaneous Supply or Accessory For Use With An Implanted Ventricular Assist Device	April 1, 2013
Q0509	Miscellaneous Supply Or Accessory For Use With Any Implanted Ventricular Assist Device For Which Payment Was Not Made Under Medicare Part A	April 1, 2013

Q0480:Driver for use with pneumatic ventricular assist device, replacement only

Q0481:Microprocessor control unit for use with electric ventricular assist device, replacement only

Q0482:Microprocessor control unit for use with electric/pneumatic combination ventricular assist device, replacement only

Q0483:Monitor/display module for use with electric ventricular assist device, replacement only

Q0484:Monitor/display module for use with electric or electric/pneumatic ventricular assist device, replacement only

Q0485:Monitor control cable for use with electric ventricular assist device, replacement only

Q0486:Monitor control cable for use with electric/pneumatic ventricular assist device, replacement only

Q0487:Leads (pneumatic/electrical) for use with any type electric/pneumatic ventricular assist device, replacement only

Q0488:Power pack base for use with electric ventricular assist device, replacement only

Q0489:Power pack base for use with electric/pneumatic ventricular assist device, replacement only

Q0490:Emergency power source for use with electric ventricular assist device, replacement only

Q0491:Emergency power source for use with electric/pneumatic ventricular assist device, replacement only

Q0492:Emergency power supply cable for use with electric ventricular assist device, replacement only

Q0493:Emergency power supply cable for use with electric/pneumatic ventricular assist device, replacement only

Q0494:Emergency hand pump for use with electric or electric/pneumatic ventricular assist device, replacement only

Q0495:Battery/power pack charger for use with electric or electric/pneumatic ventricular assist device, replacement only

Q0496:Battery, other than lithium-ion, for use with electric or electric/pneumatic ventricular assist device, replacement only

Q0497:Battery clips for use with electric or electric/pneumatic ventricular assist device, replacement only

Q0498:Holster for use with electric or electric/pneumatic ventricular assist device, replacement only

Q0499:Belt/vest/bag for use to carry external peripheral components of any type ventricular assist device, replacement only

Q0500:Filters for use with electric or electric/pneumatic ventricular assist device, replacement only

Q0501:Shower cover for use with electric or electric/pneumatic ventricular assist device, replacement only

Q0502:Mobility cart for pneumatic ventricular assist device, replacement only

Q0503:Battery for pneumatic ventricular assist device, replacement only, each

Q0504:Power adapter for pneumatic ventricular assist device, replacement only, vehicle type

Q0506:Battery, lithium-ion, for use with electric or electric/pneumatic ventricular assist device, replacement only

**NOTE:** When determined to be medically necessary, dressings used with VADs are covered under the prosthetic device benefit as a supply necessary for the effective use of the VAD/prosthetic device. Claims for dressings necessary for the effective use of a VAD should be billed using the appropriate miscellaneous VAD supply code, depending upon whether the patient was eligible for coverage under Medicare Part A at the time that the VAD was implanted. The claims processing jurisdiction for dressings used with VADs is identical to that of other VAD replacement supplies and accessories and does not fall under Durable Medical Equipment MAC jurisdiction.
