

The Center of Innovation

The Center for Medicare & Medicaid Innovation (CMMI) develops and tests new healthcare payment and service delivery models. CMMI's models are alternative payment models (APMs) which reward health care providers for delivering high-quality and cost-efficient care.

Mission: Innovate in the pursuit of affordable and better health care for all Americans.

Vision: A health care system that achieves equitable outcomes through high quality, affordable, and person-centered care.

Research & Rapid-Cycle Evaluation Group

The Research and Rapid-Cycle Evaluation Group (RREG) helps design CMMI models to make sure the model can be effectively evaluated. When it's time to evaluate how well the model is working, we lead the evaluation efforts and communicate findings to CMS leadership and interested parties. We also conduct research to help inform CMS policy, working hand-in-hand with policy makers across the agency.

Why work with us?

You'll be part of a team leading the evaluation of changes in U.S. health care using advanced analytic techniques. We offer professional development and training opportunities to learn cutting-edge methods, with opportunity to publish findings. We prioritize work-life balance.

Skills we're looking for

We're looking for people with interest and experience in public health and/or working with the Medicare and Medicaid programs, including recent graduates.
