

# The Center of Innovation

The Center for Medicare & Medicaid Innovation (CMMI) develops and tests new healthcare payment and service delivery models. CMMI's models are alternative payment models (APMs) which reward health care providers for delivering high-quality and cost-efficient care.

**Mission:** Innovate in the pursuit of affordable and better health care for all Americans.

**Vision:** A health care system that achieves equitable outcomes through high quality, affordable, and person-centered care.

## Seamless Care Models Group

The Seamless Care Models Group (SCMG) oversees the design, implementation, and operation of innovative care delivery and payment model tests to improve the health of people with Medicare and Medicaid, improve quality of care, and reduce costs. Our portfolio includes innovative payment and delivery models related to accountable care organizations (ACOs), kidney disease, Medicare Advantage and prescription drugs. Our models aim to provide seamless care experiences across health care providers, settings, and payers and deliver more comprehensive services to improve public health.

### Why work with us?

You'll be part of a team working in a "mini-CMS" developing policy, figuring out how to operationalize it, and measuring quality. Our culture is team-oriented, and staff feel supported and empowered. We encourage and guide staff in presenting to senior leadership across the agency, as well as the Department of Health and Human Services and Office of Management and Budget. Our group's work is for people who like problem-solving, are creative and unafraid of ambiguity, and enjoy fast-paced environments with great external visibility.

### Skills we're looking for

We're looking for people with interest and experience in health care, health care finance, quality, public health and/or working with the Medicare and Medicaid programs, including recent graduates. We're also looking for people with legal backgrounds.
