Subject: EEVS Autodisenrollment Processing

Attention All Drug Card Sponsors:

This past weekend, EEVS processed autodisenrollments, including a test sample of autodisenrollments due to Part D effective dates. We are aware that some sponsors received error code 200 on their response files for some of these Part D related autodisenrollments. Sponsors should be advised that this disenrollment file should be processed as normal, as the error code does not affect the disenrollment date that the file provides you. EEVS technicians are making corrections to the system to ensure this problem does not persist, and we hope to process another small batch of Part D related autodisenrollments in the next several days. Upon successful completion of the second test batch, we will resume a weekly autodisenrollment processing schedule. Thank you.
