Subject: Enhanced Search Functionality for the Health Plan Management System (HPMS)
News and Announcements Archive

CMS has implemented enhanced search functionality in the News and Announcements archive in HPMS. Previously, this feature limited the search to the memo/announcement title and distinct keywords identified by CMS. The new functionality expands the search to include the text **inside** of the memos and attachments, which will give users more robust and comprehensive results.

Users may access the News and Announcements search using the “More” links that appear in the HPMS Memos and Announcements sections on the HPMS home page.

Please direct questions to the HPMS Help Desk at either hpms@cms.hhs.gov or 1-800-220-2028.
