

## HPMS E-Mail

**Date:** April 11, 2023

**Subject:** CY 2024 Bid-Related Updates in HPMS - 4/10/2023

CMS released the following bid-related updates last night:

### BPT Download:

- The add-in component was not automatically loading into the CY 2024 BPT. CMS has released updated generic and plan-specific BPTs.

### Plan Benefit Package:

- When an Employer Group Waiver Plan (EGWP) offers a standard bid for in-network benefits, a warning message on the Max Enrollee Out-of-Pocket Screen displayed indicating that all benefit details would be set to "In Progress." The benefit detail screens also appeared as if data entry was required, and users were unable to save this data and proceed to the next screen.
- PPO EGWPs were unable to click on "Save and Close" and "Save and Next" on the deductible screen in the Plan Level Cost Shares section after entering the plan deductible. The data was not saving, and the section was remaining in progress.
- The standard bid Maximum Out-of-Pocket (MOOP) question for PPO EGWP plans was defaulted to "No." PPO EGWPs should be able to select "Yes" or "No" for this question.
- For Part D plans offering the Basic Alternative drug benefit type, users were able to enter cost-sharing for all tiers in the Post Out-of-Pocket phase even though the Medicare defined amounts (No cost-sharing) was selected.
