Subject: CY 2024 PBP Submissions

Throughout the plan set up process, the PBP technical team has worked closely with those organizations that have encountered issues with the year-to-year copy feature. The CY 2024 year-to-year plan copy includes an added level of complexity, as it was re-engineered to accommodate a technology change, a data format change, and lastly variable changes resulting from the IRA and other policy updates.

As a best practice, CMS strongly recommends that organizations using the year-to-year plan copy review these data in the PBP prior to final submission using the “Save & Next” feature in the module. This step will check the data against the validation rules once more and identify any outstanding issues.

We thank everyone for your support and patience throughout the implementation of the new PBP for CY 2024. Please contact the HPMS Help Desk for technical assistance at [1-800-220-2028](tel:1-800-220-2028) or hpms@cms.hhs.gov.
