Date: September 26, 2022

Subject: ACTION REQUIRED: PDPFS Validation Issue

For the Part D pricing data submission window that began today, Monday, September 26, 2022, the PDPFS module was incorrectly validating against the latest submitted version of your CY 2023 formulary rather than the latest approved version.

The module has been updated to point to the latest approved version of your CY 2023 formulary. If you have received PF/FF mismatch validation findings, you must resubmit your files before week one ends on **12 noon ET on Thursday, September 29, 2022.**

Please contact the HPMS Help Desk at either hpms@cms.hhs.gov or 1-800-220-2028 for technical assistance.
