

Organ Transplantation Affinity Group

Information Session

January 31, 2024

Welcome & Housekeeping

- The webinar today is being recorded and will be posted on the **CMS National Stakeholder Call webpage** (<https://www.cms.gov/outreach-education/partner-resources/cms-national-stakeholder-calls>)
- All participants will be muted throughout the call.
- Closed captioning is available via the link in the closed caption window on the bottom of the screen.
- Members of the press may be on today's call; however, all press/media questions should be submitted using the CMS Media Inquiries Form, which may be found at [cms.gov/newsroom/media-inquiries](https://www.cms.gov/newsroom/media-inquiries).

Opening Remarks

Session Objectives

1. Provide an overview of OTAG's formation, framework, purpose, goals, metrics, and high-level action plan.
2. Describe collaboration efforts between HRSA and CMS through OTAG.
3. Obtain feedback related to OTAG, particularly in the key areas of collaboration between HRSA and CMS, and ways stakeholders can get involved.

Agenda

Start Time	Topic	Speakers
2:00 pm	Welcome & Opening Remarks	Jean Moody Williams (CMS) and Suma Nair (HRSA)
2:05 pm	OTAG Overview	Jean Moody Williams (CMS)
2:15 pm	OTAG Action Plan and Collaborative Efforts	Suma Nair (HRSA)
2:30 pm	Moderated Question and Answer	Attendees
2:45 pm	Wrap-up & Closing Comments	Suma Nair (HRSA)

OTAG Overview

Building a Case for Action: System Performance

The need for organs continues to outpace the number of organs available for transplantation.

**Every 10
Minutes**

another person is
added to the national
transplant waiting list^[1]

**~ 103,327
Individuals
are Waiting**

on the national
transplant waiting list^[1]

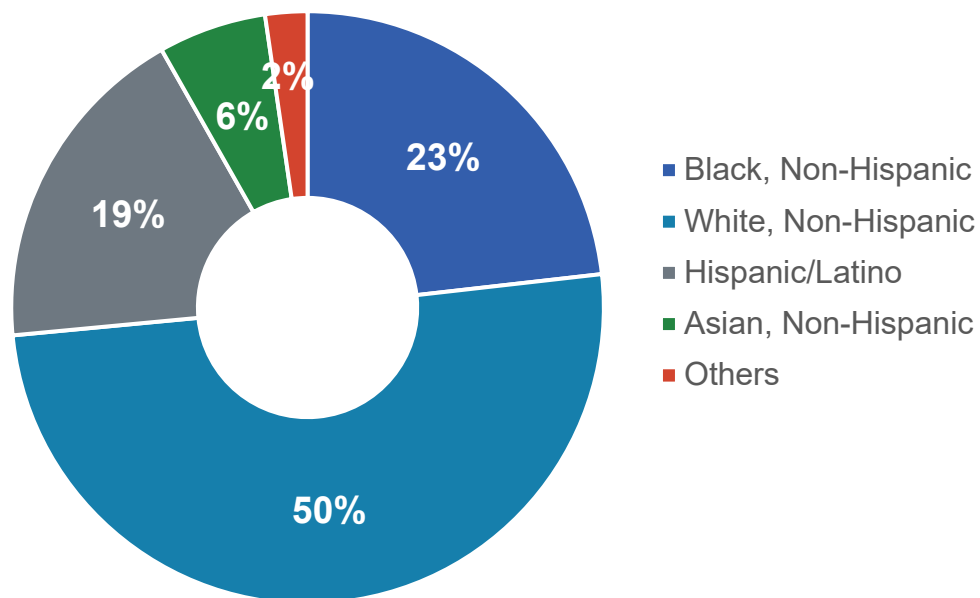

**~ 17 People
Die Daily**

waiting for an organ
transplant^[1]

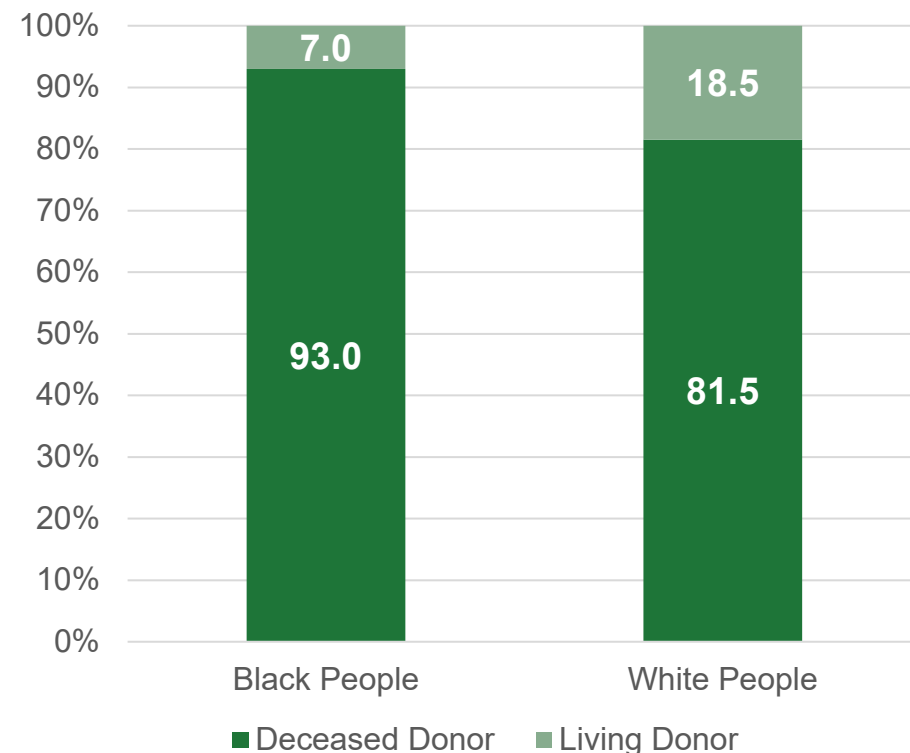

Building a Case for Action: System Equity

Access to organ transplantation varies not only by geography, but also by factors such as race, ethnicity, disability status, and socioeconomic status.

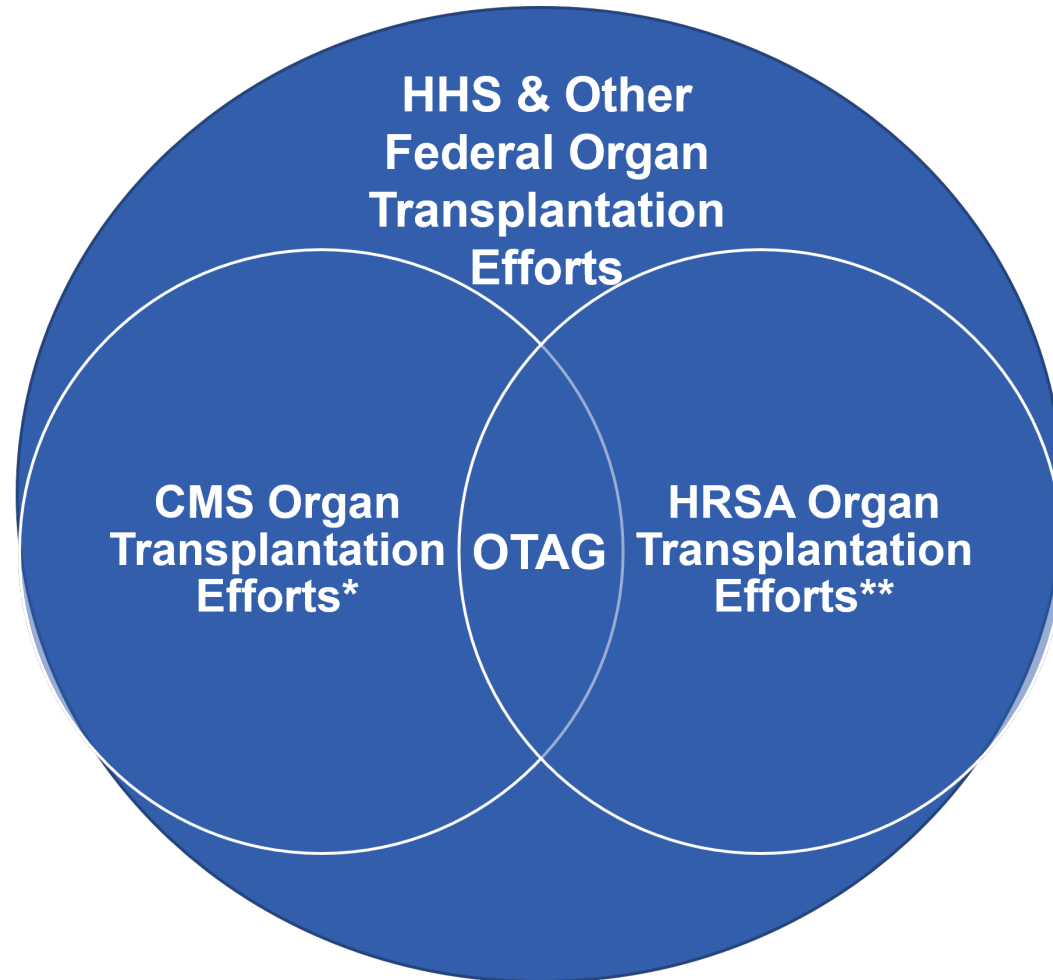

Transplants in the U.S. by Recipient Race and Ethnicity [3]

Transplants by Donor Type for Black People and White People [4]

OTAG: Driving Coordination and Collaboration

Mission: Effectively use data-driven approaches to maximize the impact of government levers to advance health equity, quality, safety, and outcomes in organ donation and transplantation.

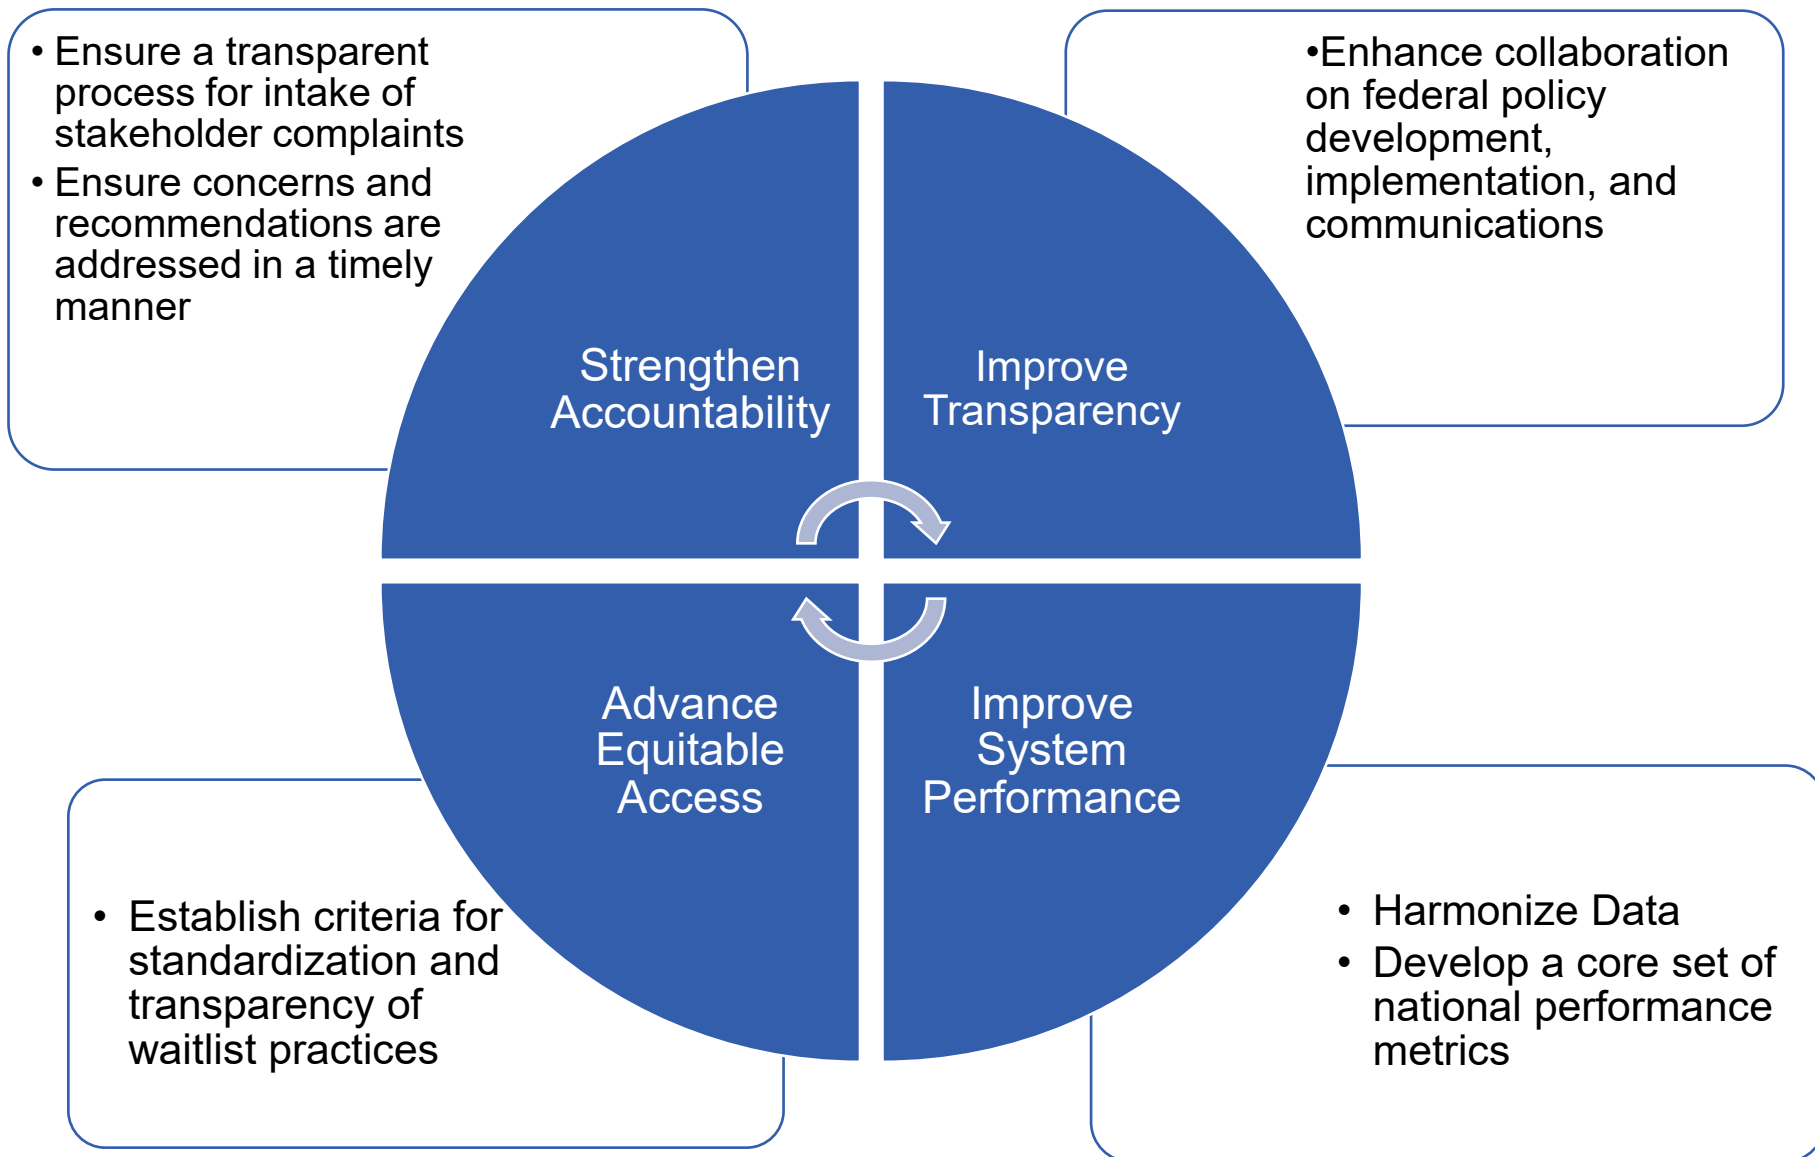

Vision: A transformed organ donation and transplantation system that equitably and successfully procures and transplants organs to save and enhance patient quality of life.

Purpose: Improve interagency and interdepartmental coordination and collaboration to improve the organ donation and transplantation system for all stakeholders

*Payment and Oversight of Organ Procurement Organizations and Transplant Centers

** Manage Waiting Lists and Organ Allocations via the Organ Procurement and Transplantation Network

A Whole of Government Approach

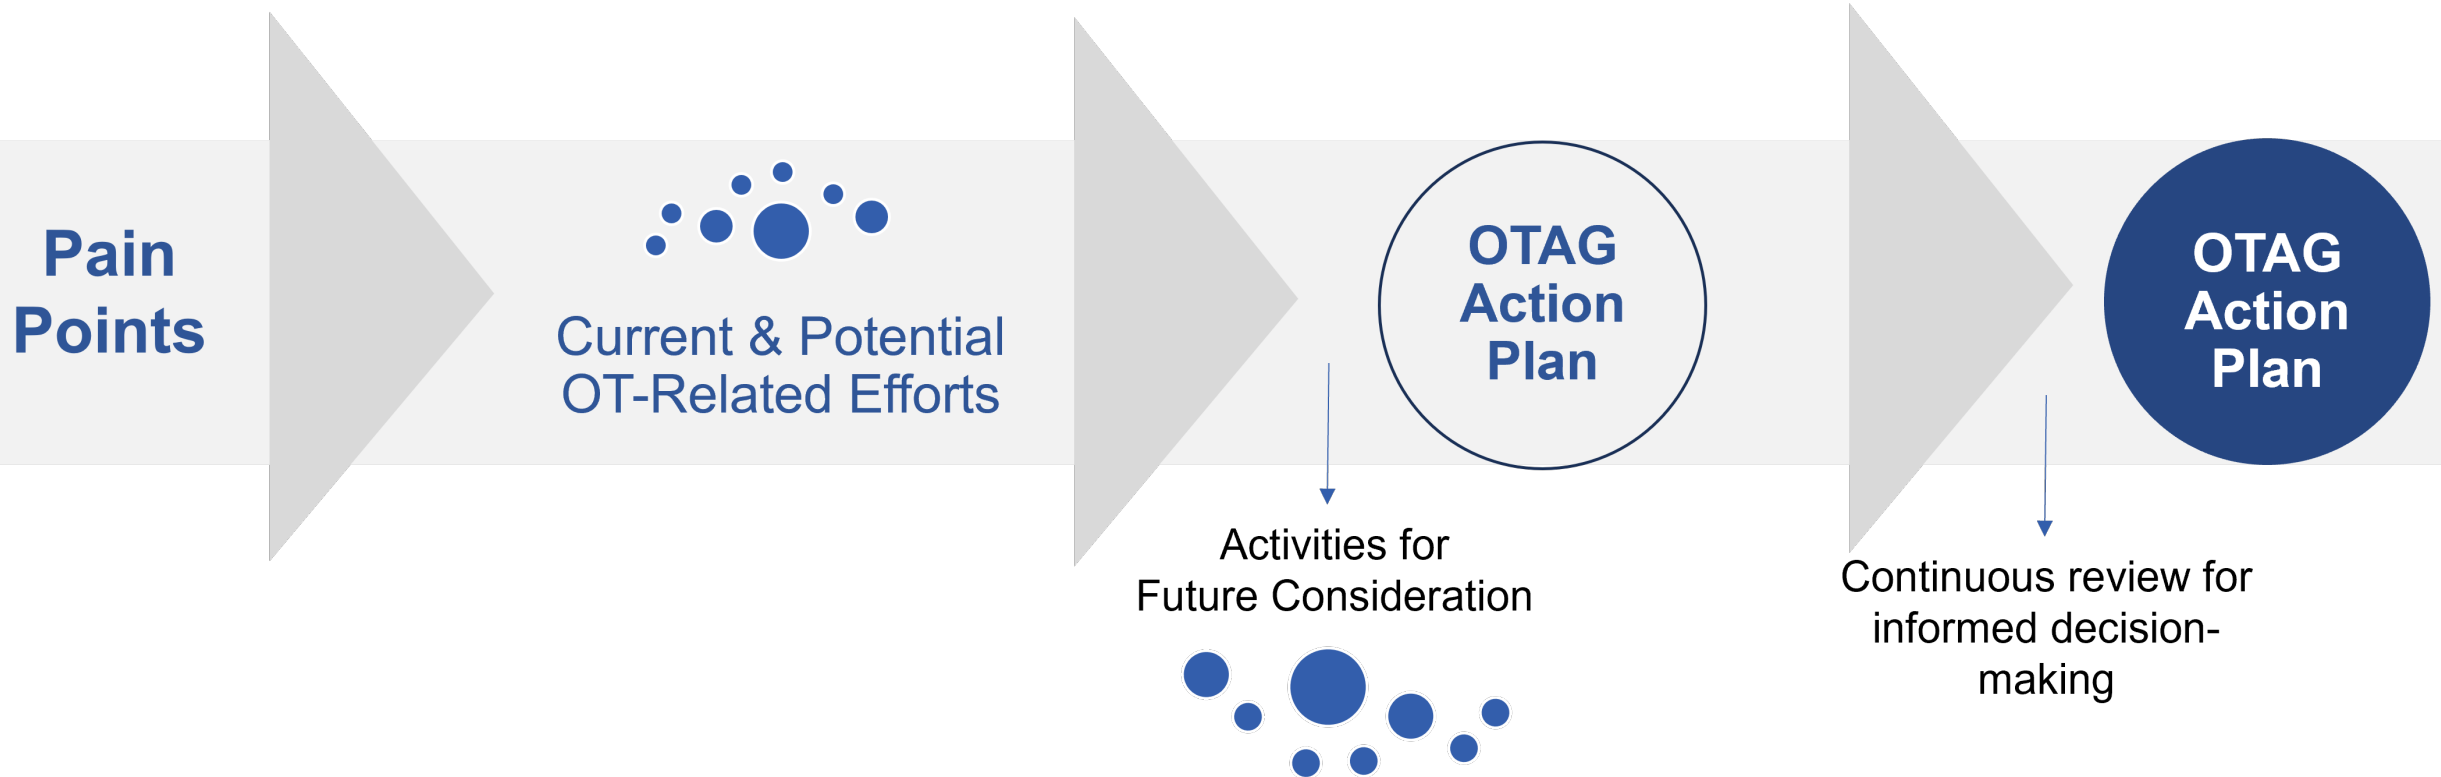

OTAG's Approach to Developing its Action Plan includes Several Phases

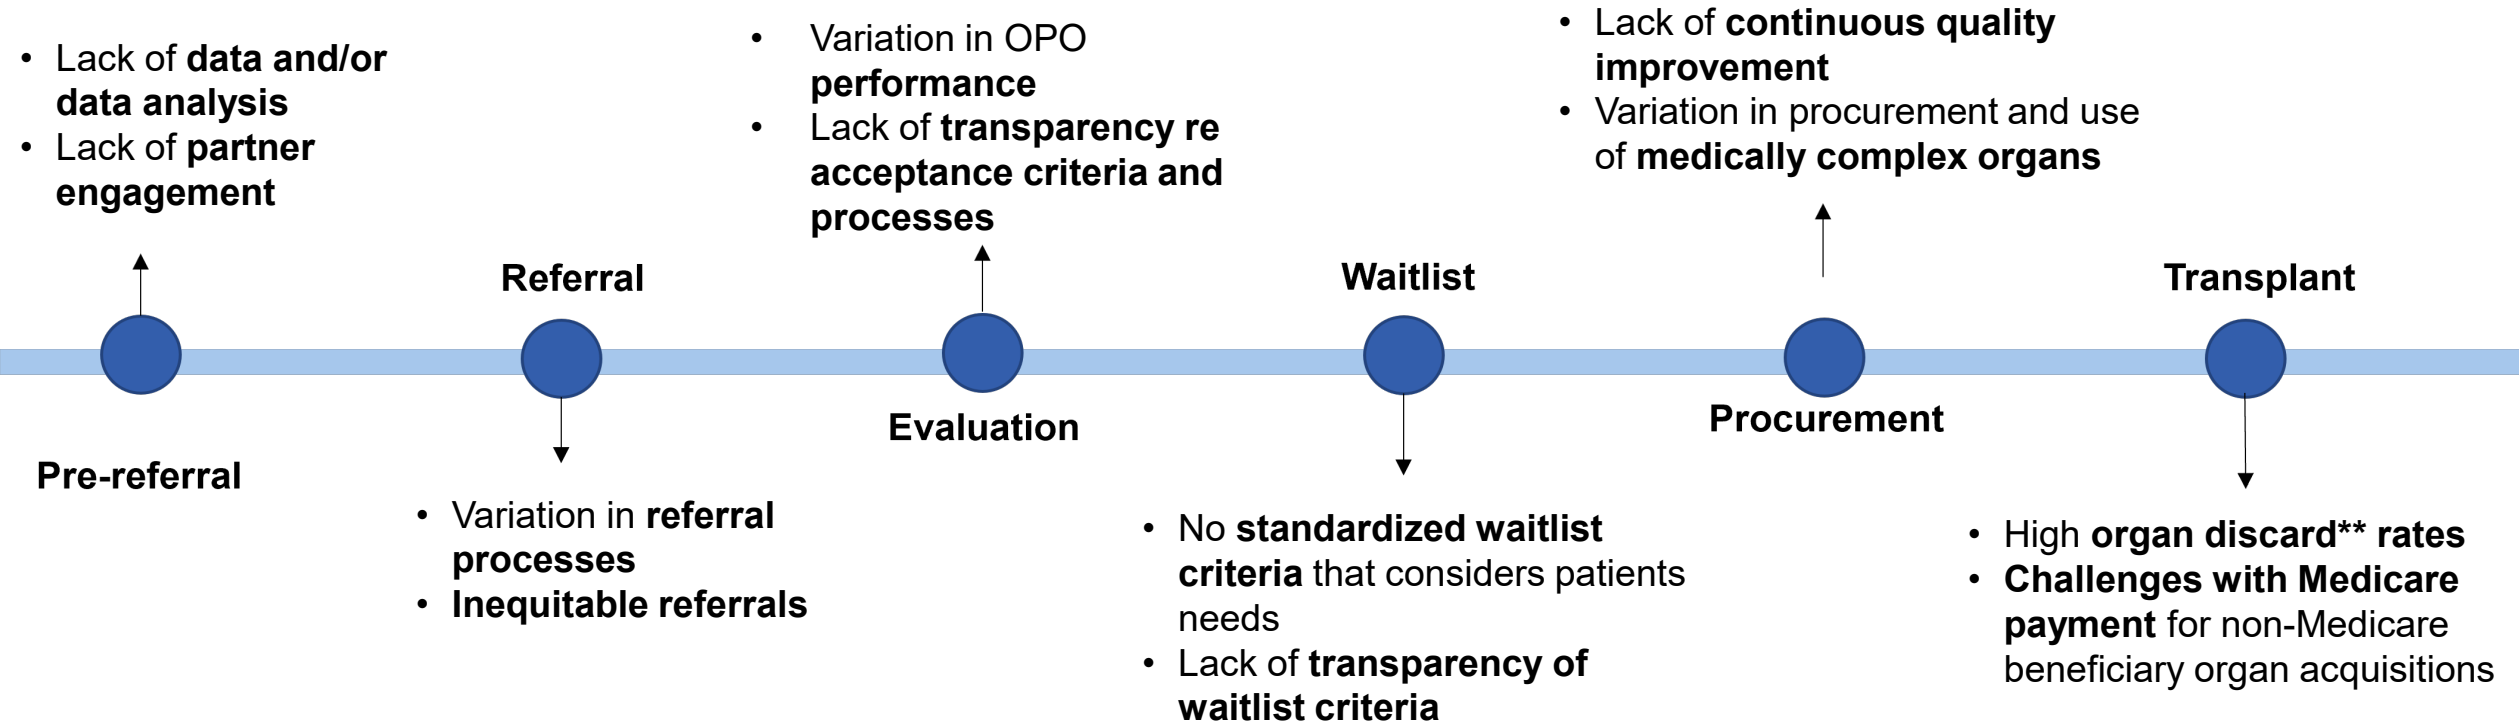

Landscape Assessment

Prioritization

Interested Parties' Input

OTAG's Landscape Assessment Identified Common Challenges Patients* Face Along their OT Journey

*OTAG recognizes that other interested parties (i.e., transplant surgeons) share some of these challenges (e.g., lack of transparency) that may also impact a patient's journey.

OTAG Action Plan & Collaborative Efforts

OTAG Action Plan Goals

Reduce variation of pre-transplant and referral practices

Empower patients, families, and caregivers to actively engage in the transplant journey

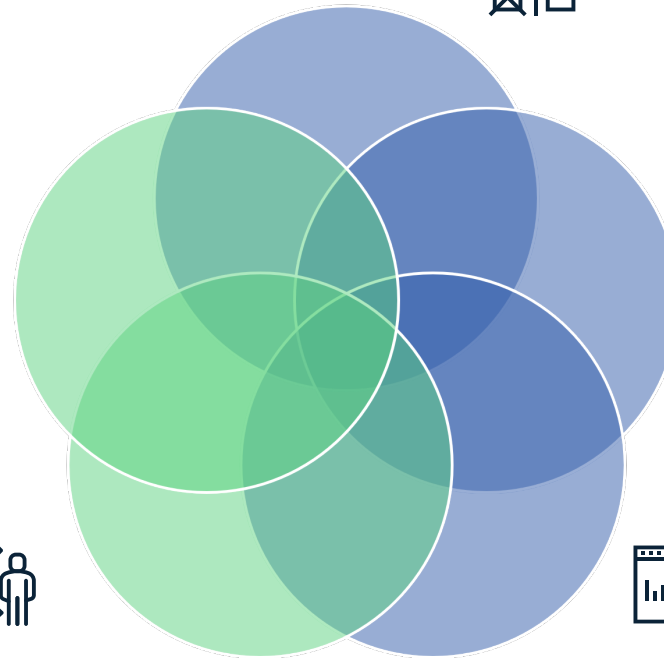

Increase availability and use of donated organs

Promote equitable access to transplants

Increase accountability for organ procurement and matching

Aim: Improve System Equity

Aim: Improve System Performance

OTAG ACTION PLAN TO IMPROVE THE PERFORMANCE AND EQUITY OF THE U.S. ORGAN TRANSPLANTATION SYSTEM

2 AIMS

5 GOALS

9 STRATEGIES

Improve U.S. Organ Transplantation System Performance

- Reduce variation of pre-transplant and referral practices
- Increase availability and use of donated organs
- Increase accountability for organ procurement and matching

- Improve transparency of pre-transplant and referral practices.
- Establish criteria for standardization and transparency of waitlist practices.
- Remove barriers to use of donated organs, including living and medically complex organs.
- Ensure organ acquisition payment policies promote equity and support organ procurement.
- Identify performance measures and incentives to drive accountability for systems change.
- Support U.S. organ transplant system operations, including embedding CQI efforts across the system.

Improve U.S. Organ Transplant System Equity

- Promote equitable access to transplants
- Empower patients, families, and caregivers to actively engage in the transplant journey

- Ensure OPTN policymaking processes and policies drive equity in organ donation and transplantation.
- Improve transparency of referral and waitlist processes for patients, families, and caregivers.
- Enhance patient, family, and caregiver education and engagement.

OTAG Action Plan: Aim 1

AIM	GOALS	STRATEGIES
<p>Improve U.S. Organ Transplantation System Performance</p>	<ul style="list-style-type: none"> ➤ Reduce variation of pre-transplant and referral practices ➤ Increase availability and use of donated organs ➤ Increase accountability for organ procurement and matching 	<ul style="list-style-type: none"> • Improve transparency of pre-transplant and referral practices. • Establish criteria for standardization and transparency of waitlist practices. • Remove barriers to use of donated organs, including living and medically complex organs. • Ensure organ acquisition payment policies promote equity and support organ procurement. • Identify performance measures and incentives to drive accountability for systems change. • Support U.S. organ transplant system operations, including embedding CQI efforts across the system.

OTAG Action Plan: Aim 2

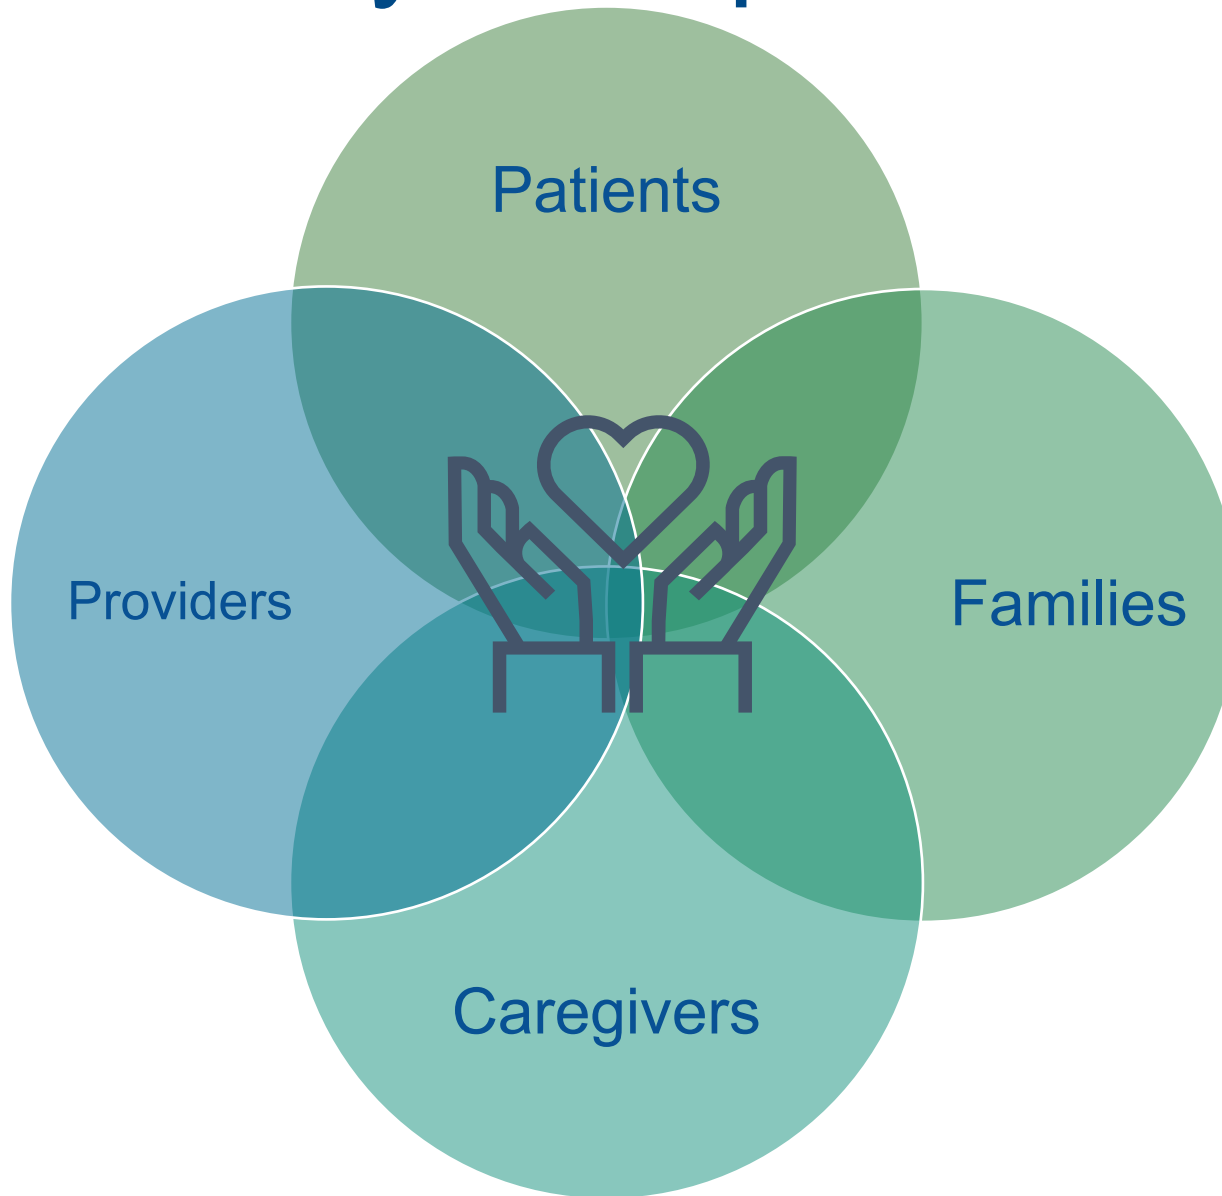

AIM	GOALS	STRATEGIES
<p>Improve U.S. Organ Transplantation System <u>Equity</u></p>	<ul style="list-style-type: none">➤ Promote equitable access to transplants➤ Empower patients, families, and caregivers to actively engage in the transplant journey	<ul style="list-style-type: none">• Ensure OPTN policymaking processes and policies drive equity in organ donation and transplantation.• Improve transparency of referral and waitlist processes for patients, families, and caregivers.• Enhance patient, family, and caregiver education and engagement.

Recent Accomplishments

- On January 18, 2024, CMS released a memo clarifying the definition of “donor” in the Organ Procurement Organization (OPO) Conditions for Coverage (CfCs). Specifically, this clarification addresses the use of the pancreata for islet cell research that are included in the definition. (QSO-24-04-[OPO])
- On September 22, 2023, the [Securing the U.S. Organ Procurement and Transplantation Network Act](#)^[5] was signed into law. This Act supports HRSA’s efforts to implement changes to the OPTN through expanded authority to award grants, contracts, or cooperative agreements and the removal of an annual cap on appropriations, making it easier to ensure best-in-class operations and technology and achieve the aims of OPTN Modernization.
- On April 28, 2023, CMS reinforced its strategy for oversight of OPOs with the release of the [2023 OPO Public Performance Report](#)^[6] reflecting the first full year of operations following the publication of the December 2020 Conditions for Coverage final rule. This report uses the new outcome measures and tier status, reflecting OPO performance data from 2021.
- On March 22, 2023, HRSA launched the [OPTN Modernization Initiative](#)^[7] to better serve the needs of patients and families. This Initiative is focused on strengthening accountability, equity, and performance in the organ donation and transplantation system through five key areas: technology, data transparency, governance, operations, and quality improvement and innovation.

Discussion

We need your input to succeed

CMS and HRSA are releasing elements of the OTAG Action Plan as part of ongoing efforts to seek input and engagement from interested parties.

OTAG's success relies on coordination, innovative thinking, and collaboration. Input from partners like you is critical to help us create a better performing and more equitable organ transplantation system in the U.S.

Please Use the Q&A Function to Respond

1. The national goals presented are not an exhaustive list of all of CMS' or HRSA's work; however, the goals are immediate priorities to address system challenges. From your perspective, do you think the OTAG national goals identify and address transplantation system challenges accurately? Are there gaps in the goals proposed?
2. We all appreciate that you have different perspectives on how to achieve the same aim. What goals and activities would you consider as the highest priority to achieve the national goals listed?

Need more time to respond?

Feel free to send feedback to OTAG@cms.hhs.gov

Thank you!
