

**CMG Grouper Package Errata
DLL Version 2.60**

ISSUE #1 – Addressed 9/13/2011

There are similar errors in the following documentation files:

- “ProgDoc.pdf” on page 1 in the third paragraph.
- “TechDoc.pdf” on page 1 in the last paragraph.

In both cases, the documentation incorrectly states that 7 comorbidities were added and 2 comorbidities were deleted with CMG DLL Version 2.60. Version 2.60 added 19 comorbidities and deleted 4. The correct set of comorbidities was implemented in the software. Appendix C of “ProgDoc.pdf” presents the list of comorbidities actually used and the 19 comorbidities added are indicated in that appendix. The list of the 4 comorbidities deleted appears in Appendix D of “ProgDoc.pdf”.
