

Use of High Risk Medications in the Elderly (DAE)

Contents

OVERVIEW	1
TECHNICAL SPECIFICATIONS.....	3
APPENDIX 1.....	5

OVERVIEW

Measure Description

- The percentage of patients 65 years of age and older who received at least one high-risk medication.
- The percentage of patients 65 years of age and older who received at least two different high-risk medications.

Deviations from HEDIS Specifications

- The denominator from the third-party specifications includes beneficiaries who have “continuous medical and pharmacy benefit enrollment for the measurement year with no more than one gap in enrollment of up to 45 days during the measurement year. The patient must be enrolled as of December 31 of the measurement year.” The common enrollment specifications (and exclusion of 2010 part year beneficiaries) mean that all beneficiaries in the denominator will have enrollment for all of 2010. Also, the allowed gap of 45 days for HEDIS specs is different from the one-month gap allowed in our specs.
- The third-party specifications do not specify the setting for the NDC codes, but there are no NDC codes on claims other than Part D so we will only be searching in Part D claims.

Assumptions/Notes

- The eligible population for this measure is based on discharges, not patients. This differs from how the eligible population is defined for other performance measures. It is possible for the denominator to contain multiple discharge records for the same individual.

Data Sources

Denominator inclusion data:

- 2010 Part A file
- 2010 Part B file
- 2010 Part D file

Denominator exclusion data:

- None

Numerator inclusion data:

- 2010 Part D file

Denominator

Beneficiaries are included in the denominator if the following criteria are met:

- 65 years and older as of December 31 of the measurement year
- Continuous medical and pharmacy benefit enrollment for the measurement year with no more than one gap in enrollment of up to 45 days during the measurement year
- Enrolled as of December 31 of the measurement

Denominator Exclusions

- None

Numerator

Beneficiaries are included if the beneficiary meets the following criteria:

- Numerator 1: At least one prescription dispensed for any high-risk medication during the measurement year.
- Numerator 2: At least two prescriptions dispensed for different high-risk medications during the measurement year.

Rate Calculations

For both rates, a lower rate represents better performance.

TECHNICAL SPECIFICATIONS

Denominator

The eligible population of beneficiaries who were a) 65 years and older as of December 31 of the measurement year and b) have continuous medical and pharmacy benefit enrollment for the measurement year with no more than one gap in enrollment of up to 45 days during the measurement year. Note that the patient must be enrolled as of December 31 of the measurement year.

A. For each beneficiary_i attributed to provider_k use the enrollment arrays created in the enrollment pre-processing program and create NCQA_HRME_DEN_i = 1 if:

1. 65 <= Years between BENE_DOB and 12/31/2010 **and**

The sum of the Part A, B, and D enrollment flags in each month of 2010 is less than 3 in no more than one month. The sum of the flags in December 2010 must be equal to 3.

Denominator Exclusions

None.

Numerator

Numerator 1 - At least one prescription dispensed for any high-risk medication (Table DAE-A) during the measurement year.

Identify different drugs using the Drug ID field located in the NDC list on NCQA’s Web site (www.ncqa.org). NCQA provided a comprehensive list of medications and NDC codes to www.ncqa.org on November 15, 2010. Please see the Excel file Table DAE-A - Use of High-Risk Medications in the Elderly (DAE).xls for the list of NDCs to use.

- A. For each beneficiary i, create NCQA_HRME1_NUM_i variable
- B. Search the 2010 Part D File and flag beneficiaries for inclusion in the numerator.
 1. NCQA_HRME1_NUM_i = 1 if
 2. At least **one** of the following occurred between 1/1/2010 and 12/31/2010 for beneficiary_i in the 2010 Part D File **where** NCQA_HRME_DEN_i = 1:

Description	Variable Name	Values/Rule (Unless otherwise noted, only require one {n} to equal the value)	Label
NDC	Product service ID: short sas name = PRDSRVID, long sas name = PROD_SRVC_ID	High-Risk Medications – See Appendix 1	DAE_IIB2_NDC_A_11 DAE_IIB2_NDC_B_11 DAE_IIB2_NDC_C_11

C. **Else** NCQA_HRME1_NUM_i = 0

Numerator 2 - At least two prescriptions dispensed for different high-risk medications (Table DAE-A) during the measurement year.

D. For each beneficiary i , create NCQA_HRME2_NUM $_i$ variable

E. Search the 2010 Part D File and flag beneficiaries for inclusion in the numerator.

1. NCQA_HRME2_NUM $_i$ = 1 if

2. At least **two** of the following occurred between 1/1/2010 and 12/31/2010 for beneficiary $_i$ in the 2010 Part D File **where** NCQA_HRME_DEN $_i$ = 1:

Description	Variable Name	Values/Rule (Unless otherwise noted, only require one {n} to equal the value)
NDC	Product service ID: short sas name = PRDSRVID, long sas name = PROD_SRVC_ID	High-Risk Medications – See Appendix 1

Else NCQA_HRME2_NUM $_i$ = 0

Provider Performance Measure

A. For each provider $_k$, create

- $NCQA_HRME1_RATE_k = (\sum NCQA_HRME1_NUM_i / \sum NCQA_HRME1_DEN_i) * 100$

B. For each provider $_k$, create

$NCQA_HRME2_RATE_k = (\sum NCQA_HRME2_NUM_i / \sum NCQA_HRME2_DEN_i) * 100$
