

1. What is a Type 2 SNF Stay?
 - A. A SNF stay with a PPS 5-Day assessment and Discharge Tracking Record.
 - B. A SNF stay with a matched pair of PPS 5-Day assessment and a PPS Discharge Assessment.
 - C. A SNF stay with a PPS 5-Day assessment and no Death in Facility Tracking Record.
 - D. A SNF stay with a PPS 5-Day assessment and a matched Death in Facility Tracking Record.

Answer: D. A SNF stay with a PPS 5-Day assessment and a matched Death in Facility Tracking Record.

Rationale: The definition of a Type 2 SNF Stay is A SNF stay with a PPS 5-Day assessment matched with a Death in Facility Tracking Record.

2. All of the following are determinants of an incomplete stay except...
 - A. Death.
 - B. SNF PPS Part A stay greater than 3 days.
 - C. Discharge to acute, psychiatric, or long-term care hospital.
 - D. Unplanned discharge.

Answer: B. SNF PPS Part A stay greater than 3 days.

Rationale: The determinants of an incomplete stay include death; discharge to acute, psychiatric, or long-term care hospital; unplanned discharge; or SNF PPS Part A stay **less** than 3 days.

3. Which of the following is **not** a SNF QRP QM?
 - A. Application of Percent of Residents Experiencing One or More Falls with Major Injury (Long Stay).
 - B. SNF Functional Outcome Measure: Discharge Self-Care Score for Skilled Nursing Facilities.
 - C. Changes in Skin Integrity Post-Acute Care: Pressure Ulcer/Injury.
 - D. Application of Functional Outcome Measure: Change in Mobility Among Long-Term Care Hospital Patients.

Answer: D. Application of Functional Outcome Measure: Change in Mobility Among Long-Term Care Hospital Patients.

Rationale: The first three selections are QMs in the SNF QRP, the last is a QM selection is not.
