1. Which MDS 3.0 CASPER report allows you to view the item responses for each item for an accepted MDS 3.0 assessment?
    A. Error Detail by Facility report.
    B. Assessments with Error Number XXXX report.
    C. NH Assessment Print report.
    D. NH Final Validation report.

   Answer: C. NH Assessment Print report.
   Rationale: This is the only MDS 3.0 CASPER report in the choices provided that allow you to view the item responses for each item for an accepted MDS 3.0 assessment.

2. The Review and Correct Reports contain resident-level data for each QM
    A. True.
    B. False

   Answer: A. True.
   Rationale: The Review and Correct reports contain assessment-based measure data and resident-level data which is now available for each measure. It is the SNF QRP QM reports that do not have resident-level data for the claims-based measures.

3. QM calculations for the Review and Correct reports are performed on a _____ basis.
    A. Weekly.
    B. BiWeekly.
    C. Monthly.
    D. Annual.

   Answer: A. Weekly.
   Rationale: QM calculations are performed weekly and on the first day of each quarter.

4. For each assessment-based measure, the Provider Threshold Report displays which of the following?
    A. Compliance calculations for each measure.
    B. Percentage of resident assessments meeting the data completion threshold.
    C. Total number of assessments that meet compliance requirements.

   Answer: B. Percentage of resident assessments meeting the data completion threshold.
   Rationale: In addition to the percent of resident assessments meeting the data compliance threshold, the Provider Threshold Report also displays the number of successfully submitted resident assessments and the number of resident assessments meeting the data completion threshold.
