

2016 Physician Quality Reporting System Qualified Registries

CMS is pleased to announce the qualified registries that will be able to report quality measure data to CMS, on behalf of eligible professionals (EPs) for the 2016 Physician Quality Reporting System (PQRS) program year (PY). These entities have self-nominated and indicated that they meet the requirements as outlined by CMS in the 2016 Physician Fee Schedule final rule. The 2016 qualified registries are able to report quality measure data to CMS, on behalf of individual EPs, Group Practice Reporting Organization (GPRO) group practices, or both (depending on the registry) for the PY 2016 PQRS. In addition to PQRS, the data submitted by qualified registries may also be used for other CMS Initiatives like the Value-based Payment Modifier and Physician Compare. For more information on reporting via registry, please review the [Registry Reporting](#) page of the [PQRS](#) website.

Individual EPs and PQRS group practices wishing to submit data via a qualified registry for PY 2016 should review the qualified entities listed in the table below. Each of the 2016 qualified registries have provided detailed information including their contact information, the measures they support, the services they offer and the costs incurred by their clients.

Disclaimer: Each vendor has reviewed their organization's information below and provided confirmation of accuracy. Information included in this document was accurate at the time posting; however CMS cannot guarantee that these services will be available or that the vendor will be successful uploading their files during the submission period. CMS cannot guarantee an eligible professionals success in providing data for the program. Successful submission is contingent upon following the PQRS program requirements, the timeliness, quality, and accuracy of the eligible professionals data provided for reporting, and the timeliness, quality, and accuracy of the XML programming of the vendor.

We report on all measures and measure groups via all applicable data submission pathways with a 100% success rate. Our services and solutions allow providers and practices to effectively manage outcomes in support of PQRS, MU, Values Based Payment Modifier (VBM), QCDR, ACO, PCMH and Population Health from a programmatic as well as a reporting perspective. Our products can be viewed at http://www.reportingmd.com/products.html</p> <p>Total Outcomes Management (TOM™): Ideal for large practices that want to manage outcomes by extracting data from EHR's, Lab's, PMS's, and other applications and loading it through our secure client web portal. TOM™ is ONC Certified HIT for Stage 2 Meaningful Use and facilitates single submission for both PQRS and MU. TOM™ defines the gaps in care needed to successfully manage patient care, identify process improvement opportunities and facilitate the adoption of evidence-based medicine, thus changing the way physicians practice singular or multiple TINs for GPRO or individual EPs. In addition, track your VBM performance, optimize and manage patient outcomes, and maximize VBM quality scores. Interfaces available for all EHRs. Program navigation for PQRS, QCDR, MU, and VBM is free for TOM users!</p> <p>Contact us for a demo at: http://reportingmd.com/products/tom/ Volume discounts available.</p> <p>Medical Informatics Calculator (MIC): Our MIC product is a data entry application starting at \$249/provider for up to 9 individual measures or 1 measure group. This tool is primarily designed for solo EPs, GPRO, or small group practices that can report on measures groups but has the capability of allowing for individual measures reporting as well.</p> <p>Contact us for a demo and customized pricing. http://reportingmd.com/contact/</p> <p>Cost: Starting at \$249</p>
