

## Quick Reference Chart: Descriptors of G-codes and Modifiers for Therapy Functional Reporting

**Please note:** The information in this publication applies only to the Medicare Fee-For-Service Program (also known as Original Medicare).

The Middle Class Tax Relief and Jobs Creation Act (MCTRJCA) of 2012 amended the Social Security Act to require a claims-based data collection system for outpatient therapy services, including physical therapy (PT), occupational therapy (OT), and speech-language pathology (SLP) services. The system collects data on beneficiary function during the course of therapy services to better understand beneficiary conditions, outcomes, and expenditures. Beneficiary function information is reported using 42 nonpayable functional G-codes and seven severity/complexity modifiers on claims for PT, OT, and SLP services. Information on the required use of these codes and modifiers for Functional Reporting of PT, OT, and SLP services is available in the Medicare Claims Processing Manual, Chapter 5, Section 10.6: <https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/downloads/bp102c15.PDF>.

**Note:** Due to CY 2019 Physician Fee Schedule (PFS) rulemaking, effective for dates of service on or after January 1, 2019, Medicare no longer requires the functional reporting of nonpayable HCPCS G-codes and severity modifiers – adopted to implement section 3005(g) of MCTRJCA – on claims for therapy services. For details about these payment policies, see MLN Matters article MM11120 at <https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNMattersArticles/Downloads/MM11120.pdf>.

## SEVERITY/COMPLEXITY MODIFIERS

For each nonpayable functional G-code, one of the modifiers listed below must be used to report the severity/complexity for that functional limitation. The severity modifiers reflect the beneficiary's percentage of functional impairment as determined by the clinician furnishing the therapy services.

Modifier	Impairment Limitation Restriction
CH	0 percent impaired, limited or restricted
