

Evaluation of the Oncology Care Model

Supplemental Appendices

Final Report

May 2024

SUBMITTED BY:

Abt Global:

Matthew Trombley, Project Director
6130 Executive Boulevard
Rockville, MD 20852

IN PARTNERSHIP WITH

Harvard Medical School
GDIT
Geisel School of Medicine at Dartmouth

PREPARED FOR:

Jessica McNeely:

Center for Medicare & Medicaid Innovation
Centers for Medicare & Medicaid Services
7500 Security Boulevard
Baltimore, MD 21244

AUTHORS

Abt Global:

Matthew Trombley, Sean McClellan, Nadine Chami,
Qing Zheng, Derek Hoodin, Louisa Buatti

Harvard Medical School:

Nancy L. Keating, Mary Beth Landrum, Lauren Riedel,
Michael P.-H. Liu, Joyce Lii

Geisel School of Medicine at Dartmouth:

Gabriel A. Brooks

General Dynamics Information Technology:

Colleen Kummet, Van Doren Hsu, Stephanie Shao

23 SD. CLINICAL ANALYSES

SB. Payment Outcome Analyses

Exhibit SB-1: Reductions in Total Episode Payments Were Driven by Higher-Risk Episodes

Total Episode Payments	OCM N=1,746,368			COMP N=1,919,516			Impact Estimates Through PP11			
	Number of Episodes	Baseline Mean	Int Mean	Number of Episodes	Baseline Mean	Int Mean	DID	90% LCL	90% UCL	Percent Change
Episode risk group										
Lower-risk episodes	568,673	\$7,339	\$7,583	654,543	\$7,388	\$7,613	\$18	-\$95	\$132	0.2%
Higher-risk episodes	1,177,695	\$40,304	\$50,604	1,264,973	\$39,578	\$50,776	-\$898	-\$1,314	-\$483	-2.2%
Cancer type										
Low-risk breast cancer	410,791	\$5,400	\$5,552	417,544	\$5,441	\$5,615	-\$22	-\$123	\$79	-0.4%
Low-intensity prostate cancer	145,974	\$11,440	\$11,992	215,930	\$11,317	\$11,914	-\$45	-\$308	\$219	-0.4%
High-risk breast cancer	175,823	\$35,986	\$42,497	174,238	\$34,750	\$42,629	-\$1,367	-\$1,863	-\$872	-3.8%
Lung cancer	162,906	\$39,734	\$57,611	171,530	\$39,013	\$58,106	-\$1,217	-\$1,816	-\$617	-3.1%
Lymphoma	100,418	\$44,925	\$50,788	99,393	\$45,418	\$52,985	-\$1,704	-\$2,787	-\$620	-3.8%
Colorectal cancer	90,598	\$35,854	\$36,558	94,206	\$34,481	\$36,667	-\$1,482	-\$2,283	-\$682	-4.1%
Multiple myeloma	106,252	\$54,340	\$79,354	109,443	\$53,880	\$79,370	-\$477	-\$1,763	\$809	-0.9%
Non-reconciliation eligible cancers ^a	88,398	\$36,995	\$49,252	117,909	\$35,119	\$47,555	-\$178	-\$1,088	\$732	-0.5%
High-intensity prostate cancer	71,769	\$41,633	\$45,312	84,537	\$41,060	\$45,468	-\$728	-\$1,616	\$161	-1.7%
Chronic leukemia	61,152	\$44,629	\$52,592	62,890	\$44,561	\$52,396	\$128	-\$762	\$1,018	0.3%

Shading indicates statistically significant estimates at $p \leq 0.01$, $p \leq 0.05$, and $p \leq 0.10$, indicated by dark blue, medium blue, or light blue shading.

Source: Medicare claims 2014–2021.

Notes: ^aNon-reconciliation eligible cancers are types of cancer identified by CMS to be rare. OCM episodes for these cancer types are not included in performance-based payments, although practices may submit claims for Monthly Enhanced Oncology Services payment during treatment episodes for these types of cancer. OCM: OCM intervention group. COMP: Comparison group. Int.: Intervention period. PP: Performance period. DID: Difference-in-differences. LCL: Lower confidence limit. UCL: Upper confidence limit.

Exhibit SB-2: OCM Reduced TEP for Higher-Risk Episodes and for Several Individual Cancers; Impact Varied by Performance Period

Total Episode Payments	Period-by-Period Impact Estimates

Source: OCM Patient and Caregiver Surveys, April 2016–December 2021; data collection for these episodes occurred from January 2017 through August 2022.

Notes: The dates in the exhibit indicate the range of episode start dates included in each survey wave. OCM episodes lasted for 180 days, and patients typically received surveys roughly 6–9 months following the start of their episode. Estimates were weighted for sampling and nonresponse and adjusted for demographic characteristics, health status, cancer type and treatment duration, the calendar month when the episode was triggered, practice characteristics, and the incidence and prevalence of COVID-19 cases and deaths during each episode. Patients with a COVID-19 diagnosis during the episode were excluded from analysis.

10/21–12/21	54.1%	19.7%	10.6%	61.3%	13.5%	5.0%	16.2%	14.8%

Source: OCM Patient and Caregiver Surveys, April 2016–December 2021; data collection for these episodes occurred from January 2017 through August 2022.

Notes: The dates in the exhibit indicate the range of episode start dates included in each survey wave. OCM episodes lasted for 180 days, and patients typically received surveys roughly 6–9 months following the start of their episode. Estimates were weighted for sampling and nonresponse and adjusted for demographic characteristics, health status, cancer type and treatment duration, the calendar month when the episode was triggered, practice characteristics, and the incidence and prevalence of COVID-19 cases and deaths during each episode. Patients with a COVID-19 diagnosis during the episode were excluded from analysis. PHE: Public health emergency.

SC.1.3 Caregiver-Reported Experiences during Patients' Last Month of Life

Exhibit SC-7: Overall Caregiver Experiences with Care in Patients' Last Month of Life Changed Little During OCM

Period	Care Team Rated Excellent or Very Good, %	Provider Followed End-of-Life Wishes a Great Deal of the Time, %	Higher-Risk Episodes				Provider Always Explained Things in a Way Patient Could Understand, %*	Provider Always Spent Enough Time, %*

Source: OCM Patient and Caregiver Surveys, April 2016–December 2021; data collection for these episodes occurred from January 2017 through August 2022.

Notes: The dates in the exhibit indicate the range of episode start dates included in each survey wave. OCM episodes lasted for 180 days, and patients typically received surveys roughly 6–9 months following the start of their episode. Estimates were weighted for sampling and nonresponse and adjusted for demographic characteristics, health status, cancer type and treatment duration, the calendar month when the episode was triggered, practice characteristics, and the incidence and prevalence of COVID-19 cases and deaths during each episode. Patients with a COVID-19 diagnosis during the episode were excluded from analysis.
