Medicaid Services (CMS)

Transmittal 124

Date: October 29, 2004

CHANGE REQUEST 3551

SUBJECT: Common Working File (CWF) Duplicate Claim Edit for Referred Clinical Diagnostic and Purchased Diagnostic Services

- I. SUMMARY OF CHANGES:** This instruction implements a new duplicate claim edit in the Common Working File to identify and reject claims for referred clinical diagnostic laboratory services and purchased diagnostic services when the same services are billed to more than one carrier.

NEW/REVISED MATERIAL - EFFECTIVE DATE*: April 1, 2005

IMPLEMENTATION DATE: April 4, 2005

Disclaimer for manual changes only: The revision date and transmittal number apply to the red italicized material only. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

SUBJECT: Common Working File (CWF) Duplicate Claim Edit for Referred Clinical Diagnostic and Purchased Diagnostic Services

I. GENERAL INFORMATION

A. Background:

Medicare recognizes that a clinical diagnostic laboratory may refer a specimen to another clinical diagnostic laboratory for testing. Generally, Medicare requires that the entity that furnishes the service, in this case the clinical diagnostic laboratory that performs the test, bill for the service. However, §1833(h)(5)(A)(ii) of the Social Security Act permits, under certain conditions, a clinical diagnostic laboratory to bill for a clinical diagnostic laboratory fee schedule service that was performed by another clinical diagnostic laboratory.

Prior to July 1, 2004, many carriers were unable to process a claim for a referred clinical diagnostic laboratory test when the test was performed in another jurisdiction because they did not possess the fee schedule of that other jurisdiction. Moreover, CMS has not previously required carriers to adjudicate a claim for a referred clinical diagnostic laboratory service furnished in another jurisdiction. Thus, some carriers previously paid for referred clinical diagnostic services performed outside of their jurisdiction while others did not. In addition, some carriers have permitted reference laboratories located outside of their jurisdiction to enroll by issuing “reference-use-only” Provider Identification Numbers (PINs) for the reference laboratories to use when billing for a referred clinical diagnostic service that was performed within their jurisdiction.

Effective for claims with dates of service on or after July 1, 2004, CMS has implemented a national clinical laboratory fee schedule and instructions to make fees for all localities within the United States available to their carriers for processing of diagnostic laboratory claims, including claims for referred clinical diagnostic services performed outside of their jurisdiction. CMS billing guidelines for referred clinical diagnostic services specify that: 1) an independent clinical laboratory may bill only the carrier in which it is enrolled by reason of having a physical presence; 2) an independent clinical laboratory may not enroll with a carrier as a “reference-use-only” laboratory; 3) every carrier must adjudicate a claim for a referred clinical diagnostic service, regardless of where the service was performed, if the claim is submitted by a laboratory located in its jurisdiction; 4) every carrier must pay for a referred clinical diagnostic service on the basis of the fee schedule in effect in the jurisdiction where the test was performed; 5) every carrier must cancel all existing “reference-use-only” enrollments and “reference-use-only” PINs and refrain from making any further “reference-use-only” enrollments; 6) the referring laboratory must identify a referred service as such on the claim and identify the reference laboratory performing such test; and 7) both the referring laboratory and the reference laboratory must be enrolled in Medicare.

In addition to allowing clinical diagnostic laboratories to bill for referred clinical diagnostic services, Medicare allows laboratories, physicians, and independent diagnostic testing facilities (IDTFs) to bill for

purchased tests and interpretations, provided that they perform one component of the test. Under the current carrier jurisdictional pricing rules, these physicians/suppliers must bill the purchased test or interpretation to the carrier that has jurisdiction over the geographic location where the test or service was performed (i.e., the carrier that would be billed by the supplier if the test component or interpretation had not been purchased).

Since the implementation of carrier jurisdictional pricing edits on April 1, 2004, CMS has received reports that, due to current enrollment restrictions, some physicians/suppliers purchasing diagnostic tests/interpretations are unable to receive reimbursement for these services when the services are performed outside of their local carrier's jurisdiction. To address this problem, CMS is implementing a national abstract file of the Medicare Physician Fee Schedule (MPFS) containing Healthcare Common Procedural Coding System (HCPCS) codes billable as a purchased diagnostic test/interpretation, for every locality throughout the country. Effective with the implementation of the abstract file in April 2005, carrier jurisdiction rules for purchased diagnostic tests/interpretations will be changed to allow suppliers to bill their local carriers for these services and receive the correct payment amount, regardless of the location where the service was performed.

Although CMS has issued billing guidelines for both referred clinical diagnostic laboratory services and purchased diagnostic services specifying that these services must be billed to the local carrier with the implementation of the respective fee schedules, either the physician/supplier performing the service, or the purchasing/referring physician/supplier (as applicable) may bill for the service. To address a potential program vulnerability, CMS is implementing a new Common Working File (CWF) edit for both referred clinical diagnostic laboratory services and purchased diagnostic services to identify as duplicate claims those claims that are submitted for the same service, provided to the same beneficiary, and provided on the same date, when these claims are submitted to more than one carrier.

B. Policy:

Effective April 1, 2005, the CWF will implement a new edit to check for duplicate claims for referred clinical diagnostic laboratory and purchased diagnostic services submitted by physicians/suppliers to more than one carrier. This new edit will be constructed to identify as duplicates of previously paid claims those claims submitted for referred clinical diagnostic/purchased diagnostic services when **all** of the data matches on the following claim fields **and** the claims contain different carrier numbers:

- a. Beneficiary Name
- b. Beneficiary Health Insurance Claim Number (HICN)
- c. Current Procedural Terminology (CPT)/Healthcare Common Procedure Coding System (HCPCS) Code
- d. Date of Service
- e. CPT/HCPCS Code Modifier

NOTE: Referred clinical laboratory services are identified for processing purposes by the presence of a "90" modifier. When performing the data matching, the CWF duplicate claim edit for referred clinical diagnostic/purchased diagnostic services will not include the "90" modifier on referred laboratory claims in the matching criteria, but will perform matching on all other criteria specified above.

The CWF duplicate claim edit will only apply to claims containing a CPT code that is included on the clinical laboratory fee schedule (i.e., CPT codes in the range from 80000 through 89999), or a HCPCS code that is included on the Abstract File for Purchased Diagnostic Tests/Interpretations to be implemented in April 2005. The attached file contains a preliminary list of HCPCS codes to be included in the upcoming release of the national abstract file. In December 2004, CMS will issue a test abstract file for use in planning the 2005 national abstract file implementation. A final list of HCPCS codes will be provided to the CWF maintainer at that time, for use in implementing the business requirements specified in this instruction.

Effective with the implementation of this new edit, the CWF will reject a claim for a referred clinical diagnostic/purchased diagnostic service when it identifies the claim as a duplicate of a previously paid claim, using the above matching criteria. The edit will identify as duplicate claims only those claims that match on all of the above data elements when the claims contain different carrier numbers. Claims with matching data elements but the same carrier number will not be subject to this edit. The existing edits for identifying suspected duplicate claims will continue to apply.

Carriers should deny the appropriate claim lines when claims are rejected by the CWF duplicate claim edit, and should use the most appropriate duplicate claim messages on the remittance advice notices and Medicare summary notices generated for these claims. When the CWF rejects a claim as a duplicate of a previously paid claim, it will return with a trailer notice containing the carrier number and internal control number of the previously paid claim. The carrier should retain this information for later use in an appeal of the claim denial.

If the carrier determines that a referred clinical diagnostic/purchased diagnostic claim rejected by CWF is not a duplicate of another claim submitted for the same service, and that the service is allowable, the carrier should use the CWF override code to allow payment.

C. Provider Education:

A Medlearn Matters provider education article related to this instruction will be available at www.cms.hhs.gov/medlearn/matters shortly after the CR is released. You will receive notification of the article release via the established "medlearn matters" listserv. Contractors shall post this article, or a direct link to this article, on their Web site and include information about it in a listserv message within one week of the availability of the provider education article. In addition, the provider education article must be included in your next regularly scheduled bulletin. Contractors are free to supplement Medlearn Matters articles with localized information that would benefit their provider community in billing and administering the Medicare program correctly.

II. BUSINESS REQUIREMENTS

"Shall" denotes a mandatory requirement

"Should" denotes an optional requirement

Requirement Number	Requirements	Responsibility (place an "X" in the columns that apply)
