For Medicare Administrative Contractors (MACs):

The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC statement of Work. The contractor is not obliged to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

SUBJECT: Data Quality between the Fiscal Intermediary Shared System (FISS) and the Common Working File (CWF)

EFFECTIVE DATE: April 1, 2015

**Unless otherwise specified, the effective date is the date of service.*

IMPLEMENTATION DATE: April 6, 2015

I. GENERAL INFORMATION

A. Background: The Centers for Medicare & Medicaid Services (CMS) and the Fee-for-Service (FFS) Summit Workgroup has established a goal to reduce the number of data anomalies between the FFS shared systems, the Common Working File (CWF) and the National Claims History (NCH). The CMS Data User Group (CDUG) and other downstream users of the NCH data have identified several instances where the data was not accurate and therefore not reliable.

The purpose of this Change Request (CR) is for the Fiscal Intermediary Shared System (FISS) to review the analysis provided by the Common Working File (CWF). The analysis contains the data elements currently stored and passed on to the National Claims History (NCH) to determine what is being edited and identifying the source.

B. Policy: There is no policy change associated with this change request.

		993	fields below this line are specific to the copybook column they appear in													
		994														
		995														
		996														
		997		PIC X	1											
		998		PIC X	4										Created by MQR; it is the generation number of the qdg backup file of a batch.	
		999		PIC X	8										First 5 bytes is the intermediary number from the claim; the last 3 bytes are spaces.	
		1000		PIC 9	1										Numeric claim ric = '1' for Inpatient, '2' for SNF; created by the reformat module.	
		1001														
		1002		PIC 9	8										Daily date of the MQR/MQA system; populated by this date being moved in by program MQRD010C.	
		1003		PIC S9(9) COMP-3	5										Assigned by program MQRD010C. It is an assignment from 1 by 1 until the last claim for that run. The number 1 to infinity for all claims processed for that	
		1004		PIC 9	2										The total number of records for the Part A claim, taken from the first record of the claim.	
		1005		PIC 9	2										The segment number, 1 thru a possible 10, taken from each record of the claim.	
		1006		PIC 9	8										Edit driver program MQAP010D places the daily run date of MQR/MQA into this field; equivalent to the MQR date previously.	
		1007														
		1008		PIC X	2										The disposition code is moved from the claim record to this field.	
		1009		PIC X	4										In MQR, the claim transaction ID (HUIP, HUOP, HUHC, HUIH, HUBC, or HUDC) is moved to these four bytes as the TRAN ID. In MQA, the primary error code is moved into the leader in this field and it overlays the tran-id value	
		1010		PIC X	1										The count of additional errors encountered in the MQA edits is moved to this field.	
		1011		PIC X	1										For Part A claims, position 1593 of the claim is moved here; for Part B claims, pos. 466 is moved here.	
		1012		PIC X	1										For MQR, it contains the segment number that the claim number falls in: there are four segments covering the total of all claim numbers, by claim number ranges. For MQA, it is used for various indicators for each particular claim, depending where you are processing within that	
		1013		PIC X	1										Contains a default value of ' R '. Doesn't appear to be used in any program.
