SUBJECT: Medicare Contractor Annual Update of the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM)

Effective Date: October 1, 2010

Implementation Date: October 4, 2010

I. GENERAL INFORMATION

A. Background:

Effective October 1, 2003 an ICD-9-CM code is required on all paper and electronic claims billed to Medicare carriers/A/B MACs with the exception of ambulance claims (specialty type 59).

The ICD-9-CM codes are updated annually as stated in Pub. 100-04, Chapter 23, Section 10.2. The CMS sends the ICD-9-CM Addendum out to the regional offices and Medicare contractors/A/B MACs annually.

B. Policy:

This instruction serves as a reminder to A/B MACs/Carriers/FIs that the annual ICD-9-CM coding update is effective for dates of service on or after October 1, 2010 (effective for discharges on or after October 1, 2010 for institutional providers).

An ICD-9-CM code is required for all professional claims, e.g., physicians, non-physician practitioners, independent clinical diagnostic laboratories, occupational and physical therapists, independent diagnostic testing facilities, audiologist, ambulatory surgical centers (ASCs), and for all institutional claims. However, an ICD-9-CM code is not required for ambulance supplier claims.

The CMS posts the new, revised, and discontinued ICD-9-CM diagnosis codes on the CMS Web site at http://www.cms.hhs.gov/ICD9ProviderDiagnosticCodes/07_summarytables.asp#TopOfPage on an annual basis. The updated diagnosis codes are effective for dates of service/discharges on and after October 1. Providers can view the new updated codes at this site in June. Providers can also visit the National Center for Health Statistics (NCHS) Web site at <http://www.cdc.gov/nchs/icd.htm>. The NCHS will post the new ICD-9-CM Addendum on their web in June. Providers are also encouraged to purchase a new ICD-9-CM book or CD-ROM on an annual basis.

81.0 Spinal fusion

Add note

Note: Spinal fusion is classified by the anatomic portion (column) fused and the technique (approach) used to perform the fusion.

For the anterior column, the body (corpus) of adjacent vertebrae are fused (interbody fusion). The anterior column can be fused using an anterior, lateral, or posterior technique.

For the posterior column, posterior structures of adjacent vertebrae are fused (pedicle, lamina, facet, transverse process, or “gutter” fusion). A posterior column fusion can be performed using a posterior, posterolateral, or lateral transverse technique.
