## I. GENERAL INFORMATION

### A. Background:

The latest package of CCI edits, Version 19.2, effective July 1, 2013, will be available via the CMS Data Center (CDC). The Centers for Medicare & Medicaid Services developed the National CCI to promote national correct coding methodologies and to control improper coding that leads to inappropriate payment in Part B claims. A test file will be available on or about May 2, 2013, and a final file will be available on or about May 17, 2013.

Version 19.2 will include all previous versions and updates from January 1, 1996, to the present. In the past, CCI was organized in two tables: Column 1/Column 2 Correct Coding Edits and Mutually Exclusive Code (MEC) Edits. In order to simplify the use of NCCI edit files (two tables), on April 1, 2012, CMS consolidated these two edit files into the Column One/Column Two Correct Coding edit file. Separate consolidations have occurred for the two practitioner NCCI edit files and the two NCCI edit files used for OCE. It will only be necessary to search the Column One/Column Two Correct Coding edit file for active or previously deleted edits. CMS no longer publishes a Mutually Exclusive edit file on its website for either practitioner or outpatient hospital services, since all active and deleted edits will appear in the single Column One/Column Two Correct Coding edit file on each website. **The edits previously contained in the Mutually Exclusive edit file are NOT being deleted but are being moved to the Column One/Column Two Correct Coding edit file.** Refer to the CMS NCCI webpage for additional information at <http://www.cms.gov/Medicare/Coding/NationalCorrectCodInitEd/index.html>.

**B. Policy:** The coding policies developed are based on coding conventions defined in the American Medical Association’s Current Procedural Terminology manual, national and local policies and edits, coding guidelines developed by national societies, analysis of standard medical and surgical practice, and review of current coding practice.
