SUBJECT: January 2005 Update of the Hospital Outpatient Prospective Payment System (OPPS): Summary of OPSS Outpatient Code Editor (OCE) Data Changes and OPSS PRICER Logic Changes; Changes to Payment for Diagnostic Mammography

I. GENERAL INFORMATION

A. Background: This Recurring Update Notification describes changes to the OPSS OCE data files, and the OPSS PRICER logic, to be implemented in the January 2005 update. This notification further describes changes to payment policy for diagnostic mammography. The January 2005 OPSS OCE and OPSS PRICER will reflect the Healthcare Common Procedure Coding System (HCPCS), Ambulatory Payment Classification (APC), HCPCS Modifier, and Revenue Code additions, changes, and deletions identified in this notification. Unless otherwise noted, all changes addressed in this notification are effective for services furnished on or after January 1, 2005. January 2005 revisions to OPSS OCE instructions and specifications are provided in Change Request 3583, “January 2005 Outpatient Prospective Payment System Code Editor (OPSS OCE) Specifications Version 6.0.”

B. Policy: The policies implemented in this instruction were discussed in the 2005 OPSS final rule, which was published in the **Federal Register** on November 15, 2004.

1. Attachment: January 2005 OPSS OCE Summary of Data Changes

Attachment A to this instruction is the OPSS OCE Summary of Data Changes, effective January 1, 2005. This document summarizes all of the changes made to APCs, HCPCS and CPT procedure codes, APC assignments, status indicators, modifiers, revenue codes, and OCE edits to update the OPSS OCE.

2. Changes to the OPSS PRICER Logic

The following list contains a description of all OPSS PRICER logic changes that are effective beginning January 1, 2005.

- a. CMS is in the process of reviewing the wage indexes for the Inpatient Prospective Payment System (IPPS). This review may impact the wage index values. We emphasize that our methodology for adjusting OPSS payment and copayment rates for geographic wage differences using the IPPS wage index has not changed. Our policy has consistently been to adopt the IPPS wage index for purposes of payment under the OPSS. We will publish finalized tables in a future **Federal Register** document and issue final wage index values in the January 2005 OPSS PRICER. Changes related to the transition to core-based statistical areas (CBSAs) are explained in Change Request 3272, Transmittal 152, “Inclusion of Core-Based Statistical Area (CBSA) Data Elements to the Provider Specific Files,” issued April 30, 2004. Specific instructions regarding the impact on OPSS claims processing of these wage index changes will be issued when the final tables are completed.

- b. New OPPS payment rates and coinsurance amounts will be effective January 1, 2005. APCs have coinsurance amounts limited to 45 percent of the payment rate, effective January 1, 2005. Some APCs have coinsurance limits equal to the inpatient deductible of \$912, effective January 1, 2005.
- c. For outliers for hospitals, we will change the factor multiplied by the total line item payments from 2.6 to 1.75. In addition, the cost for the line item must exceed the APC payment plus a fixed dollar threshold of \$1,175. The factor used to multiply the difference between line item payments and costs remains at 50 percent.
- d. For outliers for Community Mental Health Centers (CMHCs; bill type 76x), we will change the factor multiplied by the total line item payments from 3.65 to 3.5. The factor used to multiply the difference between line item payments and costs remains at 50 percent.
- e. There are no device offsets for 2005.

3. Payment for Diagnostic Mammography

Section 614 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) provides for a change in payment for diagnostic mammography, including diagnostic computer aided detection (CAD) services furnished by hospitals subject to the OPPS. Effective for claims with dates of service on or after January 1, 2005, Medicare will pay for diagnostic mammography and CAD services based on the Medicare Physician Fee Schedule (MPFS). Payment will no longer be made under the OPPS.

C. Provider Education:

A Medlearn Matters provider education article related to this instruction will be available at www.cms.hhs.gov/medlearn/matters shortly after the CR is released. You will receive notification of the article release via the established "medlearn matters" listserv. Contractors shall post this article, or a direct link to this article, on their Web site and include information about it in a listserv message within one week of the availability of the provider education article. In addition, the provider education article must be included in your next regularly scheduled bulletin. Contractors are free to supplement Medlearn Matters articles with localized information that would benefit their provider community in billing and administering the Medicare program correctly.

DEFINITIONS

- A blank in a field indicates 'no change'
- The "old" column describes the attribute prior to the change being made in the current update, which is indicated in the "new" column. If the effective date of the change is the same as the effective date of the new update, 'old' describes the attribute up to the last day of the previous quarter. If the effective date is retroactive, then 'old' describes the attribute for the same date in the previous release of the software.
- "Unassigned", "Pre-defined" or "Placeholder" in APC or HCPCS descriptions indicates that the APC or HCPCS code is inactive. When the APC or HCPCS code is activated, it becomes valid for use in the OCE, and a new description appears in the "new description" column, with the appropriate effective date.
- Activation Date (ActivDate) indicates the mid-quarter date of FDA approval for a drug, or the mid-quarter date of a new or changed code resulting from a National Coverage Determination (NCD). The Activation Date is the date the code becomes valid for use in the OCE. If the Activation Date is blank, then the effective date takes precedence.
- Termination Date (TermDate) indicates the mid-quarter date when a code or change becomes inactive. A code is not valid for use in the OCE after its termination date.
