

CMS Manual System	Department of Health & Human Services (DHHS)
Pub 100-20 One-Time Notification	Centers for Medicare & Medicaid Services (CMS)
Transmittal 978	Date: October 27, 2011
	Change Request 7562

SUBJECT: Modify the Interchange Control Number (ICN) for Medicare Advantage Encounters

I. SUMMARY OF CHANGES: Currently Medicare Advantage (MA) plans submit data in an abbreviated claims format to CMS to provide the diagnostic information used in calculating the health status component of the beneficiary risk scores, which is used as the basis for the MA plan payment. MA plans do not currently submit information on each encounter and do not submit most elements included in the ANSI 5010 format, such as Current Procedural Terminology (CPT) codes that might be used to calculate a Fee-For-Service (FFS) payment. Therefore, CMS uses FFS data to determine beneficiary utilization patterns to predict costs in the MA program.

Adding all of a beneficiary's health care encounter data to the existing risk adjustment system will improve the accuracy of the risk adjustment model used to pay MA plans by reflecting the appropriate patterns of utilization and costs within the MA program. Thus, CMS will collect and price MA Plan encounter data to establish risk adjustment models based on MA cost and utilization.

The data will be collected from the MA Plans in the 837X Version 5010 format and submitted to a single encounter data front end system contractor. The MA Plans will submit adjudicated data which will be processed using the Medicare Encounter Data Processing and Pricing System based on modified versions of the Medicare FFS claims processing systems.

The purpose of this Change Request is to modify the Encounter Data ICN to support the large volume of Medicare Advantage Organization (MAO) encounters that will be processed by the Encounter Data System (EDS).

EFFECTIVE DATE: April 1, 2012

IMPLEMENTATION DATE: April 2, 2012

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revise information only, and not the entire table of contents.

II. CHANGES IN MANUAL INSTRUCTIONS: (N/A if manual is not updated)

R=REVISED, N=NEW, D=DELETED-Only One Per Row.

R/N/D	CHAPTER / SECTION / SUBSECTION / TITLE
N/A	

III. FUNDING:

For Fiscal Intermediaries (FIs), Regional Home Health Intermediaries (RHHIs) and/or Carriers:
No additional funding will be provided by CMS; Contractor activities are to be carried out within their operating budgets.

For Medicare Administrative Contractors (MACs):

The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

SUBJECT: Modify the Interchange Control Number (ICN) for Medicare Advantage Encounters

Effective Date: April 1, 2012

Implementation Date: April 2, 2012

I. GENERAL INFORMATION

A. Background:

Currently Medicare Advantage (MA) plans submit data in an abbreviated claims format to CMS to provide the diagnostic information used in calculating the health status component of the beneficiary risk scores, which is used as the basis for the MA plan payment. MA plans do not currently submit information on each encounter and do not submit most elements included in the ANSI 5010 format, such as Current Procedural Terminology (CPT) codes that might be used to calculate a Fee-For-Service (FFS) payment. Therefore, CMS uses FFS data to determine beneficiary utilization patterns to predict costs in the MA program.

Adding all of a beneficiary's health care encounter data to the existing risk adjustment system will improve the accuracy of the risk adjustment model used to pay MA plans by reflecting the appropriate patterns of utilization and costs within the MA program. Thus, CMS will collect and price MA Plan encounter data to establish risk adjustment models based on MA cost and utilization.

The 837 Institutional, 837 Professional, and 837 Durable Medical Equipment will be collected from the MA Plans in the 837X Version 5010 format and submitted to a single encounter data front end system contractor. The MA Plans will submit adjudicated data which will be processed using the Medicare Encounter Data Processing and Pricing System based on modified versions of the Medicare FFS claims processing systems.

The purpose of this Change Request is to modify the interchange control number (ICN) to support the large volume of Medicare Advantage Organization (MAO) encounters that will be processed by the Encounter Data System (EDS).

B. Policy:

The Inpatient Prospective Payment System Rule for 2009, published August 19, 2008, revised section 422.310 of the 42 Code of Federal Regulations and clarified that MA plans can be required to submit encounter data for each item and service provided to an MA plan enrollee.

In 2009, CMS changed its regulations to reassert the agency with the authority to collect encounter data, as already supported by statute. CMS has more recently notified stakeholders of the intent to collect encounter data in the 2010 Advance Notice, which was released in February 2009. Thus CMS will collect Part C utilization and cost data from MA plans. Encounter data will enhance CMS' ability to measure and price utilization in the managed care sector.

II. BUSINESS REQUIREMENTS TABLE

Number	Requirement	Responsibility (place an "X" in each applicable column)									
		A / B M A C	D M E M A C	F I M A C	C A R R I E R	R H R I S	Shared-System Maintainers				OTHER
					F I S S	M C S	V M S	C W F			
7562.1	Contractors shall modify the Interchange Control Number (ICN) generator for the Encounter Data Modifiable CEMs that will assign ICNs to accepted Encounters. The Encounter ICN generator will create the ICNs in YYDDDDNNNNNNNN format, as follows. Sample: 1112200000001.						X	X			CEM
7562.1.1	The Encounter ICN generator shall place the Julian format of the receipt date (YYDDDD) in positions 1 through 5.						X	X			CEM
7562.1.2	The Encounter ICN generator shall place the sequence (NNNNNNNN) in positions 6 through 13.						X	X			CEM

III. PROVIDER EDUCATION TABLE

Number	Requirement	Responsibility (place an "X" in each applicable column)									
		A / B M A C	D M E M A C	F I M A C	C A R R I E R	R H R I S	Shared-System Maintainers				OTHER
					F I S S	M C S	V M S	C W F			
	None.
