<b>Key</b>	
<b>Paragraph of Proposed Definition</b>	<b>Corresponding Phrase for Rationale</b>
(2) Procedures described within the range of CPT Category I codes that the AMA defines as "medicine" which are invasive, which are performed under general anesthesia or which are specifically designated as intraoperative services	Invasive medical procedure
(3) Procedures described within the range of CPT Category I codes that the AMA defines as "radiology" X-ray, fluoroscopy, or ultrasound procedures that require the insertion of a needle, catheter, tube, or probe through the skin or into a body orifice	Invasive radiologic procedure
(4) Radiology procedures that are integral to the performance of a non-radiological procedure described in paragraphs (1) or (2) above and performed (i) During the non-radiological procedure, or (ii) Immediately following the non-radiological procedure when necessary to confirm placement of an item placed during the non-radiological procedure	Concurrent radiologic procedure
(5) Procedures described by HCPCS Level II codes or by CPT Category III codes which are clinically similar to the procedures and services described in paragraphs (1)-(4) above	Analogous code

**Detailed Results of Expanded Budget Neutrality Calculation**

The following overarching assumptions were included in the model:

- In order to achieve positive or negative migration of current list procedures, an increase or decrease in payment of at least 10% had to be reached.
- Positive or negative migration for procedures with an ASC volume greater than 5,600 was capped at the lesser of:
  - 25% of the ASC volume
  - 25% of the HOPD volume
- Blended rates were used to calculate 2008 ASC payments
- 25% HOPD migration (new codes)
- 2% MD office migration (new codes)
- Once threshold is reached, for every 10% decrease in payment there is 1.5% migration for every increment of 10%
- Once threshold is reached, for every 10% increase in payment there is 1.5% migration for every increment of 10%
