

## **Grouper Configuration Utility for RAVEN and RAVEN-SB**

The purpose of this utility is to enable users to select the new CMI sets C05 and C06 that are in effect on 10/01/2009. The utility is a recreation of the Grouper Configuration screen within the RAVEN and RAVEN-SB software, except that now the user may select C05 and C06 for the Medicare and State RUGS calculation. Users should check with their state to determine the proper CMI settings for their RUGS calculations.

**NOTE: Whenever changes are needed to the Grouper Configuration, please do not use the screen within the data entry software. If you do, you will encounter errors attempting to save the configuration. Please use this utility instead!**

**Installation: Exit the data entry software prior to installation!** Install the software to the application directory. The installation will overwrite the existing RUGS.MDB. Therefore, it is necessary to use the utility to set the grouper configuration BEFORE re-entering RAVEN (or RAVEN-SB, if applicable).

Steps to install Grouper Configuration Utility for RAVEN and RAVEN-SB:

1. Double click on the SetupRAVENGrouperConfig utility for RAVEN.

**NOTE:** Swingbed users - Double click on the SetupRAVENSBGrouperConfig utility for Swing Bed.

2. Select Run.
3. Select Next on the Welcome to the InstallShield Wizard for Grouper Config Utility window.
4. Choose destination location for the install of the Grouper Config Utility

**NOTE:** Default is C:\MDS\ or your applicable path

5. Select Next
6. Select Install on the Ready to Install the Program window.
7. Select Finish on the InstallShield Wizard Complete window.
