QUESTION TEXT

Some managed care plans offer a point-of-service option which allows members to receive services from out-of-plan providers even in non-emergency situations. Between (SUMMARY REFERENCE DATE) and (REFERENCE DATE), [were you/was (SP)] enrolled in a point-of-service option offered by (PRIVATE PLAN NAME)?

[EXPLAIN IF NECESSARY: In a point-of-service option, the member typically pays a higher copayment when seeing an out-of-plan provider. For example, if a member sees an in-plan provider, there may only be a $10 copayment. However, the member may have to pay 20 percent of the cost and the managed care plan will pay 80 percent of the cost to receive the same service from an out-of-plan provider.]

The purpose of BOX HIS5A is determine if there is another MPDP flagged as "current" at the time of the previous round interview. Should only expect to find one "other" MPDP, if it exists.

If another MPDP is flagged as "current" at the time of the previous round interview, BOX HIS5A is routed to HIS36 - HISMPDPCHNG to determine if the "other" MPDP's status has changed.
